Android TV™ provides a smarter viewing experience. Watch blockbuster movies, stream apps, and enjoy multiplayer games. And with the Google Assistant built in, you can do more faster. Ask it questions, discover the best content, control smart devices around your home—all with just your voice.

A black Apple TV remote control is shown vertically. It features a silver 'sling' button at the top, followed by a row of four buttons: a microphone button, a power button, a play/pause button, and a stop button. Below these are four more buttons: 'mute', 'play/pause', 'next', and 'previous'. In the center is a circular 'OK' button with four directional arrows. Below the 'OK' button are four more buttons: 'back', a button with the Apple logo and 'TV' text, 'info', and 'recast'. At the bottom are four buttons: a '+' button, a '-' button, a 'Netflix' button, and a 'home' button. The 'AirTV' logo is printed at the very bottom.

Pairing guide

Press Back+Home button at the same time, the red light flashes quickly, then release, means RCU enter the pairing mode.

Pressing for few seconds and stop pressing any keys, until it pop up the message of pairing successfully.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that which the receiver is connected to.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna transmitter.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance of 20cm from your body.
