FEDERAL COMMUNICATIONS COMMISSIONS
Authorization and Evaluation Division
7435 Oakland Mills Road
Columbia, MD 21046

Dear Sir/Madam,

We, Commsignia, Inc., hereby declare that for our product, Road-Side Unit (FCC ID: 2AOZ5-CM-RS4C), only the 5905-5925 MHz frequency range will be enabled through the use of a dedicated configuration file. The designated LTE-RRC configuration file for the LTE-V2X (C-V2X) modem ensures that only the channels and bandwidth within this frequency range, as specified in the file, are utilized by the device.

This region-specific configuration file is provided directly by the modem manufacturer and is hardcoded into the device firmware during the manufacturing process. This implementation guarantees that the file cannot be altered later, ensuring compliance with regulations and proper usage of the specified frequency range.

Sincerely,

Laszlo Virag
Executive President & Chief Technology Officer
