Rear View

LEDs

MicroSD Slot

Micro-USB Charging Port

Package Contents: IMILAB C20 x 1, power adapter x 1, power cable x 1, wall-mounting accessories (screw x 1, user manual x 1)

Installation

Mount IMILAB C20 on a wall

1. Drill two holes on the wall in line with the holes of the IMILAB C20 at an interval 10. It is recommended that you mark the locations of the holes with a pencil before drilling. The diameter of each hole is approximately 3 mm, and the depth is approximately 30 mm.

2. Insert the two plastic anchors into the holes on the wall.

3. Make sure to position the base unit so that the arrow is pointing up. Secure the base unit to the wall by tightening the screws into the plastic anchors.

4. Matching the grooves on the bottom of the camera unit with the spaced slots on the bracket. Press down until the two sections are flush. Then turn the camera unit in either direction to lock it in position.

Warning:

To avoid an electric shock or injury, the device must be securely fastened to the floor/ wall as specified in the installation instructions.

When installing the security camera on a wall, please note that the wall must be able to support at least twice the product's total weight.

Product Instructions

Turning the Device On

1. If the indicator light is flashing orange, that means the device is activated successfully.

2. Once the IMILAB C20 is turned on, please do not attempt to rotate it head by force. If the camera position is incorrect, adjustments can be made through the app.

FCC Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with part 15 of the FCC Rules.

Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) This device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

Reorient or relocate the receiving antenna.

Move the equipment away from the receiver and/or receiver.

Consult the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Emission Statement

This equipment complies with FCC radiation exposure limits set forth for uncontrolled environments. The exposure should be verified or confirmed with actual measurement, the radiation level below.

WEEE Information

All products bearing this symbol are waste electrical and electronic equipment (WEEE) as in directive 2012/19/EU which should not be mixed with general household waste. Instead, you should protect human health and the environment by handing over your waste equipment to a designated collection point for the recycling of waste electrical and electronic equipment, operated by the government or local authorities. Correct disposal and recycling will help prevent potential negative consequences to the environment and human health. Please contact the retailer or local authorities for more information about this location as well as terms and conditions of such collection points.
