

Smart Life

Thank you for choosing Smart Camera

**Brief information:**

Product: Smart camera  
Wireless Encryption: WEP/WPA/WPA2 Encryption  
Support System: Android/iOS  
Power: 2.560VDC 500mA 500MS 500F8 500P

**Component Description:**

Reset Button: Press and hold "reset" button for 5sec., reset success.

It is recommended to insert 8-256GB high-speed Micro TF card, otherwise it may cause failure to store, play recorded video and other malfunctions including firmware upgrade.

Part list:  
Battery camera x 1  
Manual x 1  
USB Power Cable x 1  
Screw Accessories Package x 1

**Status Indicator**

During power on, red light indicates power status.  
Blue light indicates power status.  
Red light indicates power status.  
Green light indicates power status.  
Solid green light indicates power status.  
Yellow light indicates power status.  
Solid yellow light indicates power status.  
Solid yellow light indicates power status.

RST  
PWR  
Type C  
Charging Port  
Power ON/OFF  
TF Card

**Install APP**

Download APP: Scan the QR code below to download and install.  
Register and login: open the "Smart Life" APP to register and login according to the guide in the APP.

Please follow the instructions in the mobile APP (the instructions are for reference only).

**Add The Device-Scan QR code mode**

Make sure Wi-Fi is available and connected to the Internet.  
Connect the camera to the power, then system startup completed.  
Open "Smart Life APP" press the "+" in the upper right corner of the main screen (Figure 11), choose "Security & View Surveillance", click "Smart Camera" (Figure 12) to add camera, and then click "Next step" (Figure 13).

**Please note that only 2.4 GHz Wi-Fi network is supported.**

If the mobile phone is not connected to Wi-Fi, please click "Connect to Wi-Fi" (Figure 14).  
If it jumps to the WLAN interface and connects Wi-Fi (Figure 15).  
If the phone is connected to Wi-Fi (Figure 16).

A QR code will prompt on your screen and you need to scan it with the Smart Camera. The camera is about 20-30cm away from the mobile phone with "Next step" "Next step" "Next step" (Figure 17).

Connection completed (Figure 18), tap "Done".  
Return to preview page (Figure 19).  
After clearing the device preview page, it returns to the APP home page.  
At this time, the connected device will appear on the APP home page (Figure 20).

**Add The Device-AP Mode**

First set the machine to the hot spot and then connect the network mode.

Locate the RESET button on the machine and press it for about 1 second. After about 1 minute, the sound will ring and the hot spot will start successfully.

Select "Wi-Fi Mode" (Figure 12).  
Click AP Mode (Figure 13).  
Enter the account and password that can connect to Wi-Fi (Figure 14).

Click "Go Connect" (Figure 15).  
Go to "Smart Life-XXXX" and click Connect (Figure 16).  
Connecting (Figure 17).

Click to complete the connection (Figure 18).  
Video screen (Figure 19).

**Note**

Recommended to install in open space without metal interference.  
Avoid blocking from furniture, microwave oven, etc.  
Avoid to install in the space where the audio, video and data lines are wound, and keep away from them as far as possible.  
Install as near as possible to wireless Wi-Fi router.  
When changing to the new environment, please press and hold the reset button for 5 seconds, then connect to the network.

**The name and content of the harmful substances in the product**

Part Name	Harmful Substances					
	Pb	Hg	Cd	Cu	PBB	PFOS
Plastic	0	0	0	0	0	0
Resin	0	0	0	0	0	0
Aluminum	0	0	0	0	0	0
Steel	0	0	0	0	0	0

The product conforms to RoHS environmental protection requirements. At present, there is no mature technology in the world to replace or reduce the lead content in the electronic products, plastic, glass, steel and copper alloy.

**FCC SDoC**

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**FCC Statement:**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate

radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**RF Exposure Information:**

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
