Smart Life

Thank you for using smart camera

jz

Install App

Download APP: scan the QR code below to download and install.
Register and login: open the "Smart Life" APP to register and login
according to the prompts.

Add The Device-Scan QR code mode

- Make sure Wi-Fi is available and connected to the Internet.
- Connect the camera to the power, then system startup completed.
- Open "Smart Life" App, press the "i" in the upper right corner of the main screen (Figure 01); choose "Security & Video Surveillance"; click "Smart Camera" (Figure 02) to add camera; and then click "Next step" (Figure 03);

Please note that only 2.4 GHz Wi-Fi network is supported;

- If the mobile phone is not connected to Wi-Fi, please click "Connect to Wi-Fi" (Figure 04);
- It will jump to the WLAN interface and connects Wi-Fi (Figure 05).
- If the phone is connected to Wi-Fi (Figure 06);

- A QR code will prompt on your screen and you need to scan it with the Smart Camera, (the camera is about 20-30 cm away from the mobile phone lens). Then click "hear the prompt sound" (Figure.07).

Add device-WiFi fast connection mode

- Select "EZ Mode" (Figure 12)
Click Next (Figure 13)
Enter the account and password that can connect to WIFI (Figure 14)

Matters Need Attention

Try to keep away from the metal space:
Avoid the furniture, microwave oven blocked;
Avoid the space where the audio, video and data lines are wound, and
keep the space away from them as large as possible;
Ensure that as close as possible to the coverage of wireless Wi-Fi
signals, switching network environment;

Part Name	Hazardous Substance						P60E
	Pb	Hg	Cd	Cr(VI)	PBB	PBB	
small	○	○	○	○	○	○	○
Board	X	○	○	○	○	○	○
charger	○	○	○	○	○	○	○
annex	○	○	○	○	○	○	○

This form is based on the provisions of SJ/T 11364.

This product conforms to RoHS environmental protection requirements. At present, there is no mature technology in the world to replace or reduce the lead content in the electronic ceramics, porcelain, optical glass, steel and copper alloy.

- Click to complete the connection (Figure 15)

FCC SDoC

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Statement:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can

- connection completed(Figure 09), and click "Done";
- Then jump to preview interface (Figure 10)
- After closing the device preview interface, the interface will return to the home page. At this time, the connected device will appear in the monitoring situation without re-adding afterwards (Figure 11). Then you can click directly to the device page (Figure 11).

radioactive dose frequency (micro Sv per year), (ii) not resulting and acting in accordance with the instructions, may cause harmful interference to radio communications. In particular, there is the guarantee that interference will not occur in a particular environment, if this equipment does not cause harmful interference to radio communications. However, there is the possibility that this equipment may cause interference to radio communications or television reception, which can be determined by turning the equipment off and on. If the user is unable to eliminate the interference by the following measures:

1. Reconnect or relocate the receiving antenna.
2. Increase the separation between the equipment and receiver.
3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
4. Consult the dealer or an experienced radio/TV technician for help.

If these measures do not solve the problem, the user should be advised to report the problem to his/her competent authority. The user should be advised to report the problem to his/her competent authority if the equipment is used in a way not intended by the manufacturer or if the user is unable to operate the equipment in accordance with the instructions.

The device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference that it may receive, including interference that may cause undesired operation of the equipment.

RF Exposure Information:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
