Subject: **FCC Class II Permission Change Request for FCC ID: 2APJ4-SRM955**

Dear Sir/Madam,

This is to request a Class II Permission Change Request for FCC ID: 2APJ4-SRM955, originally granted on 03/30/2023.

The Major change filed under this application are:

1. The subject approved module is being used in a specific host (Host Model: Prime RS01, Host Name: Rugged mobile computer).
2. SAR tests were performed to verify RF compliance.
3. The antennas were installed inside the host platform enclosure, the physical restraints introduced by the host platform should have resulted in equal or lower level of radiated emission. Therefore, additional Radiated emission testing is not necessary.
4. The host antenna has the same type as originally approved with lower gains in the intentional transmit frequency bands, RF output power has been reduced from the original filing and therefore radiated performance in the intentional frequency bands is expected to be lower than that measured in the original modular approval.
5. The software security remains unchanged from the original application.

If you have any questions regarding this application, please free to contact me.

Yours Sincerely,

Signature:
