1 To charge, please conect the included USB cable into a charging port or a usable USB port on an available

hours to charge completely.

information

- volume, you will be notified with a beeping sound.
- 3 During playback, you can move the track up by holding the + button, and you can move the track down by

Voice control (usable on any device that works with Google voice search or Siri) If you hold the O button for one second, you can start up voice control. While voice control is active, if you hold the same button for one second, you can end voice control.

## How to use ear tips

Starting pairing In a power OFF state, hold the power button for four seconds and the LED will alternately blink white and orange, and the device will be in a pairing standby state. Clearing pairing Press the power button three times and the information for pairing with the

\* If there is no pairing information, then when you power ON the device, it will automatically enter a pairing

## 1 By pressing the O button, you can play music or stop it.

- 2 During playback, you can adjust the volume with the +/- button. When you reach the maximum or minimum
- holding the button.

- 1 When you have an incoming call, press the  $\bigcirc$  button to take the call. Press the  $\bigcirc$  button during the call to
- 2 When you have an incoming call, hold the O button for two seconds to refuse the call.

For the earphone tips, we have prepared a hard type that fits firmly into the ears with high air tightness, and we have also prepared a soft type that is smaller, softer, and less burdensome to the ears. If you want to enjoy powerful bass, we recommend the normal type, and if you prefer sound that is difficult to get tired of even after a long time, we recommend the double flange type.

In case earphone is easy to disengage from your ear, the ear tip may be too small or too big. Please try various

sizes so that it will be the best size.

2 When charging, the LED will turn orange. After charging is complete, the LED will turn white. It takes two

## How to use ear wings

By attaching the ear wing to the earphone, you can prevent the earphone main unit from falling out of your ear when moving vigorously while playing sports, etc.

Remove the ear tip from the earphone and attach Firmly fit the ear wings all the way in, and then the ear wing. At this time, please match the left and finally attach the earphone tips. right earphone with the left and right ear wing.
