

Plug and Play

Wi-Fi SMART PLUG

Quick Start

Control From Anywhere

This user manual will help you set up Plug and Play socket devices.

⚠ Checklist before using the device:

- Your smart phone or tablet should have connected a 2.4G WiFi with internet.
- Download and launch the “Plug and Play” App from App Store or Google Play store. Create an account and log in.
- During pairing process, make sure that your iOS or Android device and the socket device is within the range of the router.
- The device only supports 2.4G network. Please don't connect to a 5G network or hybrid network.
- Enter correct Wi-Fi passwords. Make sure that your Wi-Fi SSID and passwords don't contain special characters.

Add Device

- 1 Plug the socket device into a power outlet. Keep pressing the Pairing button (for 5 seconds) until led indicator fast blinks 3 times and repeats.
- 2 Launch APP. Select the icon on the bottom to add a device. Then select **Quick Pairing Mode (Touch)**, tap Next.

Quick Pairing (Touch)

- 3 Select the same Wi-Fi as the one your mobile device connects with. Input correct passwords. Then, tap Next.

- 4 It will auto-connect with the device. The process will take 1-3 minutes.

- 5 Once the process is complete, it will prompt you that you can rename the device. Enter a new name and Save.

If you fail to add it during the process, it will prompt you the FAQ. Please read carefully and retry accordingly.

If you have retried but failed. Please make your device enter pairing status and select **Compatible Pairing Mode**:

[Compatible Pairing Mode \(AP\)](#)

Then tap Next.

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
