

# Appendix D

## Photographs

|                                          |
|------------------------------------------|
| 1. SAR measurement System                |
| 2. Photographs of Tissue Simulate Liquid |
| 3. Photographs of EUT test position      |
| 4. EUT Constructional Details            |

## 1. SAR measurement System

## 2. Photographs of Tissue Simulate Liquid

| Photo 1: Tissue Simulant Liquid for HBBL600-10000MHz                              | NA |
|-----------------------------------------------------------------------------------|----|
|  | NA |

### 3. Photographs of EUT test position

|                                                                                     |                                                                                      |
|-------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|
| <p><b>Photo 2: Back side 0mm</b></p>                                                | <p><b>Photo 3: Back side 19mm</b></p>                                                |
|    |    |
| <p><b>Photo 4: Left side 0mm</b></p>                                                | <p><b>Photo 5: Right side 0mm</b></p>                                                |
|   |   |
| <p><b>Photo 6: Right side 14mm</b></p>                                              | <p><b>Photo 7: Right side 19mm</b></p>                                               |
|  |  |

|                                                                                    |                                                                                     |
|------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|
| <p><b>Photo 8: Top side 0mm</b></p>                                                | <p><b>Photo 9: Top side 9mm</b></p>                                                 |
|   |   |
| <p><b>Photo 10: Bottom side 0mm</b></p>                                            | <p><b>Photo 11: Bottom side 14mm</b></p>                                            |
