- Green light quickly blinking: Ready for Easy Mode connection
- Green light slowly blinking: Ready for AP Mode connection
- Red light: Switch is ON
- Off: Switch is OFF

On/Off Button(Reset Button)
▶Parameters

Input: 100V-240V~, 50/60Hz
Output: 15A(Max)
Rated Power: 1800W/120V
WiFi Frequency: 2.4GHz
Power Supply Mode: Neutral+Live Wire
▶BEFORE YOU INSTALL

WARNING! RISK OF ELECTRIC SHOCK.
Incorrect installation could be dangerous or illegal,
multiple breakers may need to be de-energized
for safe installation. Please call a professional
electrician if you are unfamiliar or uncomfortable
with electrical work.

Make sure your wiring is compatible. The Gosund
light switch replaces single pole switches only.
If your light can be turned on from two different
wall switches, that's a 3-way switch
and Gosund light switch is not compatible.

▶ Install the Gosund Light Switch

Load-Usually Red or Black

Live-Usually Black

Neutral-Usually White

Ground-Usually Green or Copper

Step 1: Shut OFF the power at the circuit breaker for the switch you are replacing. You may need to shut OFF more than one circuit breaker/switch to make sure the switch you're working on is powered OFF.

IMPORTANT: USE A NON-CONTACT VOLTAGE DETECTOR OR FLIP YOUR LIGHT SWITCH A FEW TIMES TO MAKE SURE THAT THE POWER IS OFF.

Step 2: Unscrew and disconnect the wires from the old switch using a screw driver.

Step 3: Identify the wires on your Gosund Light Switch.

Switch (Live/Load) wires - On this light switch, the Switch wires are the two black wires.

Neutral wire - The Gosund Light Switch requires this wire, but isn't always present in your electrical wiring at home. If present, the neutral wire is normally found within the wall box with a wire nut on top of it.

Ground wire - It's normally green or copper in color.

Step 4: Install the Gosund Light Switch. Connect two black wires from the Gosund Light Switch to the available Switch (Live/Load) wires. In case you found more than one wire, just place them into the wire nut. NOTE: The wire nut is the cap-like object connecting the wires.

Step 5: If you have a Ground wire (optional), disconnect it from the old switch and connect it to the green wire on the Gosund Light Switch.

Step 6: Unscrew the wire nut that is holding together the existing Neutral wires. Connect the white wire from the Gosund Light Switch to the outlet's exposed Neutral wires. Securely screw them together inside the wire nut.

▶Install the Gosund App

1. Search for Gosund App on App store /Google Play Store, or just scan the QR code below to download. (For iPhone, you can use build-in camera to scan the QR code. For Android, you may need barcode scanner to do that. Please confirm the App icon before downloading.)

PS: You can also add this smart switch to smart life app directly if you already have it on your phone, it is compatible and works the same way.

2. Register an account and memories the password, enter your email address or your phone number, then obtain verification code to complete the registry.

What to do next:

→Close this window to discover smart-home devices you can with Alexa.

How to ask Alexa to turn on/off Smart Switch

First you need to set exact name for the switch on Gosund app. If not, Alexa may tell you: "Sorry, I can't find the device named xxx…"

You can say to Alexa "Alexa, turn on/off bathroom switch", this command will help you to do the work.
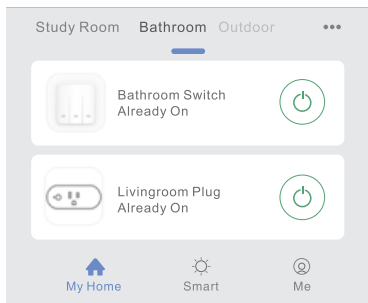

Gosund App
Alexa App

Things you can do with Alexa
* Voice Control the smart switch
* Remote Control the smart switch via Alexa App
* Add the smart switch to certain groups on Alexa App
For other questions about Alexa, please find out with Amazon Alexa support page, or contact us for help directly by email.

Tips for using Alexa Voice Control
Please make sure the device name you set for the smart switch is unique and recognizable for Alexa voice assistant.
You should make sure all the smart devices names at your home are non-repetitive and recognizable for Alexa.
Vocie assistant system needs the exact command

to do the work.

▶How To Connect with Google Home

You can do that by linking Gosund app with Google Home app, go to Google Home app and find "Works with Google" -->Search Gosund -->Enter your Gosund account -->Authorize to use.
And then the Google Home App will guide you through.

▶Trouble Shooting

Q: Why my phone connection failed ?

A:* You should try both Easy Mode and AP Mode, read page 2-page 8, make sure to follow the guide and try again.

* Confirm your home Wi-Fi is 2.4GHz and you entered the correct password during the connection.

* Remove&Install the smart switch to start again, see what happens.

Contact the after sales service for further help if you still have problems with the connection after following the steps above.

Q:Why can't I voice control it with my Alexa/Google ?

A:* Make sure you set up smart switch successfully on Gosund app, and they are working fine.

* Make sure you put correct account when you link Gosund as a skill on Alexa/Google App, and you can find it on your skills.

*Make sure your Alexa/Google device is working fine.

* Check the device names that you set for this smart switch, it should be non-repetitive and recognizable for voice assistant, Also, please make sure your native language is available for Alexa.

If you still have trouble to voice control our smart switch after followed all instructions, do not hesitate to contact us for help.

Q: Do I need to set up the device again if I changed my router?

A:Yes! you must set up the smart switch again if there is any change of the current Wi-Fi status, either you changed your router or your moved the device to a new house. However, you don't need to worry if you are just moving it inside your room, with the same Wi-Fi.

Q: Why does it turns on/off or comes offline surprisingly ?

A:Check your Wi-Fi status and make sure the electricity is fine. Check if you've set timer for it. If everything looks alright, just reset the smart switch on your app again and see what happens.

Email to after-sales services if this problem still exists.
