

User Manual

一、 the product electrical performance parameters

name	Electrical performance parameters
Input	5V/2A
Output	5V
Average efficiency	≥70%
Power consumption	Less than 0.36W
Use temperature environment	0°C -- 40°C

二、 product features

1. Small size, exquisite appearance, easy to carry out.
2. Strong compatibility, applicable to various brands of mobile phones, a multi-purpose machine.
3. Safe and reliable, using MCU control circuit to achieve multiple protection system security, wireless power technology and intelligent control circuit (overvoltage protection, undervoltage protection, overload protection, over temperature protection, short circuit protection).
4. This product meets the relevant technical requirements of the national QI standard.

三、 how to use

1、 Product illustration:

- 2、 before use, please use the appropriate charging power device access wireless charging, the phone in the wireless charging area, you can charge the phone.

Note: When the power supply is connected to the LED, the blue LED flashes and turns red. The power is always on. When the battery is charging, the blue light is on. It is charging the phone. If there is an abnormal situation or over temperature protection, the blue light To shine; if this is the case, unplug the power supply, and then plug it in again.

四、 attention

1. Please use a matching power adapter, otherwise it will affect the wireless charging efficiency;
2. If the mobile phone is equipped with a protective cover made of metal material on the back, it cannot be charged by wireless charging and must be disassembled before use.
3. During use, do not put other cards such as bus cards, bank cards, ID cards, etc. on

the wireless charger; otherwise, you may lose the stored information.

4. Please use it in a 0--40 degree environment, do not put it under direct sunlight; please use it indoors;
5. Before using, please check whether there are metal fragments in the wireless charging area and ensure that no metal fragments are used before use;
6. Non-professionals are not allowed to disassemble.

FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- - Reorient or relocate the receiving antenna.
- - Increase the separation between the equipment and receiver.
- - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- - Consult the dealer or an experienced radio/TV technician for help.
