

1

Squeeze a quarter-size dollop of the Wakeup Gel into the palm of your hand.

Spread evenly across your face.

2

Turn on the Dogface® Technobrush and gently massage the Wakeup Gel into your skin.

3

Use small circular motions and light pressure while moving the brush across your entire face. Looking directly into the red light can cause discomfort, so close your eyes while using the Technobrush near your eyes.

The Dogface® Technobrush will automatically turn off after 2 minutes.

Always use light pressure or the brush head might stall and turn off automatically. If it turns off, simply turn it back on and use less pressure.

Use the Dogface® Technobrush and Wakeup Gel daily during your morning shower routine. It is also gentle enough to use twice a day.

**WARNING: For external use only – do not ingest. Avoid contact with eyes. Discontinue use if irritation or rash develops. Keep out of reach of children.**

If your skin is sensitive, you can switch to using it every other day. Do not use Dogface® on sunburnt or injured skin. If you have a medical skin condition, consult with your physician before using Dogface®.

# Performance Skincare For the Man Routine

 dogface®

# Dogface® Essentials

The Dogface® Technobrush has a unique massaging silicone head and red-light Photomotion™.

Combined with the Wakeup Gel containing hyaluronic acid, vegetable collagen, vitamin B5, and jojoba esters, it cleanses, exfoliates, evens skin tone, balances pH, boosts elasticity, and hydrates.

Wakeup Gel

# Getting Ready

The Technobrush and silicone brush head are packaged separately. Make sure to attach the magnetic brush head to the body of the Technobrush.

Plug the charging base directly into any standard USB power supply (such as a phone charger). Place the Technobrush inside the charging base.

The orange light ring around the on button will pulse on and off while the brush is charging. When fully charged the light will remain on.

A single charge can last 3 to 4 weeks, making it easy to travel with your Technobrush.

## Skincare in the Shower

The Dogface® Shower Caddy holds the Technobrush and Wakeup Gel, while the fog resistant Dogface® Shaving Mirror provides an easy shave in the shower.

Both mount on any smooth surface, such as shower tile. Make sure that the area is dry and clean of any residue before mounting the caddy and mirror.

Select an area in your shower that is within easy reach and where you can see yourself in the mirror.

Peel off the plastic strips from the adhesive tape on the back and press firmly against the wall for 30 seconds to make sure the Shower Caddy and mirror is mounted properly.

## Dogface® Advanced

The Day Boom hydrating day cream contains hyaluronic acid, sweet almond, evening primrose and sunflower oil to hydrate the skin.

The Night Boost serum features the MICROSPONGE® delivery system that uses microscopic particles to produce a sustained release of retinol over time. Combined with vitamin C, phyto complex and hyaluronic acid, it supports reduction in the appearance of fine lines and wrinkles.

The Energizing Eye Cream contains caffeine, vitamin C, peptides and hyaluronic acid to make the area under the eyes look smoother, fresher and more awake.
