

Quick Start Guide

Step 1

Power down and unplug your home router's power cable.

Step 2

Locate the WiFi Sharing Device antennas and screw them into their respective ports.

Please note the labels on the antennas and the labels on the ports. The antennas labeled with 2.4G should be screwed onto the ports labeled 2.4G and the antennas labeled 5G will go on the other two ports.

Step 3

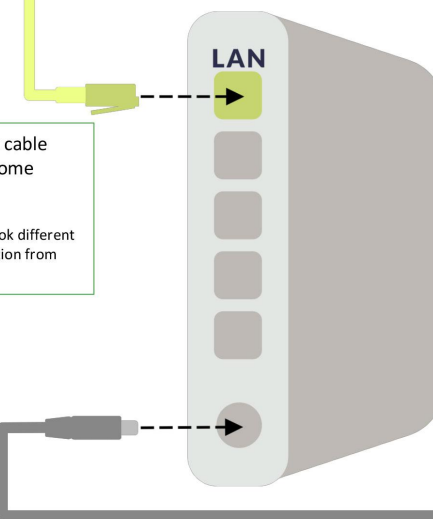

Plug one end of the provided ethernet cable into the WiFi Sharing Device's WAN port. Plug the power cable into the DC port and your power outlet.

Step 4

Plug the other end of your ethernet cable into one of the LAN ports on your home router.

Please note that your router at home may look different and the LAN ports may be in a different location from the router depicted in the diagram.

Step 5

Plug your home router's power cable back in. Power on both your WiFi Sharing Device and your home router.

Quick Start Guide

Step 6

Grab a cup of coffee and take a quick breather for about 10-15 minutes as your WiFi Sharing Device updates to the latest firmware.

Step 7

Download the Open Garden App from the Google Play Store or iOS App Store by visiting www.opengarden.com/download or scanning the QR code to complete your WiFi Sharing Device setup. This part will take less than two minutes!

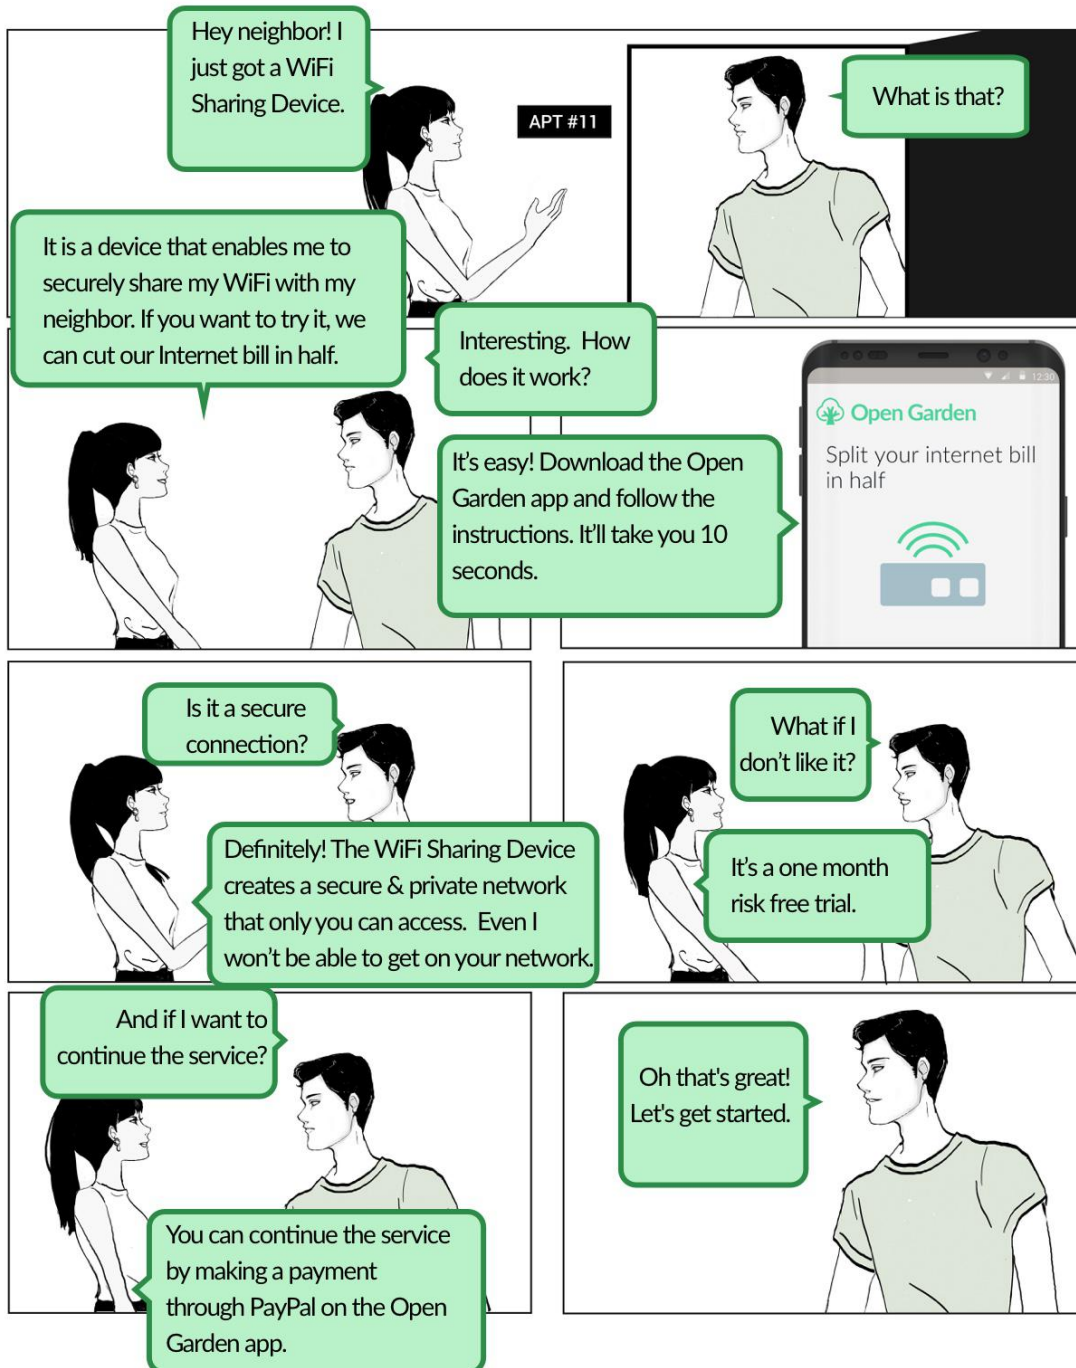

*Please review the Getting Started guide on how to share WiFi with your neighbor.
For any questions or help with the setup, please email us at support@opengarden.com or call us at 415-890-6294.*

WiFi Sharing Device - Getting Started

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum 20cm distance between the radiator your body: Use only the supplied antenna.
