Precautions

- Please remove the lens protective film when scanning the QR code to configure the network.
- Because different mobile phone models have different push settings, please set them according to your needs and model.
- Only supports 2.4G Wi-Fi, and does not currently support 5G or Wi-Fi with Chinese or special symbols.
- Since metal can easily interfere with WIFI signals, please try to avoid installing the device on a metal wall.

Q: Camera do not connect to my Wi-Fi network?

A: Make sure the camera indicator(near the reset button) is flashing. If the indicator light is not flashing, please press and hold "Reset Button" located at the back of the camera (see the Description section).

- Make sure the Wi-Fi network is a 2.4GHz network, device will not connect to a 5GHz network.
- Test your Wi-Fi network work with other devices such as your phone or computer to make sure it is operation properly.
- The Wi-Fi connection may be out of range during pairing. Use your phone to check range, it is recommended to have at least 2 signal bars showing for proper connection.
- Your Wi-Fi network password is case sensitive, make sure you are entering it correctly.

Q: The camera is off-line

A: -There may be a temporary issue with your internet connection (e.g., service disruption). Please try again in a few minutes.

- Make sure your Wi-Fi router is turned On.
- The camera may not have power source, make sure the wall switch and breaker is in the On position.
- Make sure the camera is getting a good signal from your Wi-Fi router. Use your phone to check range, it is recommended to have at least 2 signal bars showing for proper connection.

The camera may have been disconnected from your Wi-Fi network, press and hold Reset Button(see the Description section) until you hear an audible tone.
