Re: Family Certification Letter for FCC: 2AQ9C-VAPOR-CUBE18

Dear Sir/Madam:

AMI Global LLC is submitting an application for FCC Family Certification to the VAPOR-C (FCC 2AQ9C-VAPOR-CUBE18).

Family certification (multiple models) may be granted for many models of radio equipment that are electrically identical, provided that each model is assigned a unique model number by the manufacturer.

The following models are qualified for family certification: (list each model and their similarities / differences as a bullet point)

- Model: VAPOR-C and Cornell PiloT -- All of the hardware and software are identical, and the only difference is the enclosure
- Both enclosures plastic material is the same, PPG30 plastic with different colors.
- Dimensions are similar but with a different look & feel for branding purposes

Please contact me if you have any questions or need further information regarding this application.

Sincerely,

Ori Peled – CTO

AMI Global LLC.
