Dear Sir or Madam:

The chip DR882 and SKY85728 installed in our product Ammbr router (model name: AMR65N-A, FCC ID: 2AQA3AMR65N-A), which support 5G frequency band 5150-5250MHz, 5250-5350MHz, 5470-5725MHz, 5725-5850MHz, But for the product, it only activates 5G frequency band 5150-5250MHz and 5725-5850MHz, the other bands are disabled by firmware.

Please contact me if there is need for any additional clarification or information.

Best Regards,

Sincerely Yours,

Signature:

A handwritten signature in black ink, appearing to read "Paul Egermeier". The signature is fluid and cursive, with "Paul" on the left and "Egermeier" on the right.

Typed or Printed Name: Paul Egermeier
