PRODUCT SHOW

ZY1-4 wireless remote control

PRODUCT PCBA

PCBA

PRODUCT DISPLAY SIZE

product name: remote control

Product model: H1131

Features :

It is designed with beautiful exterior, Sound wave resonator(SAW) is used for stabilizing frequency, It is applied for wireless alarms, wireless controlling device, etc.

Operating voltage	DC12V
Operating current	12mA
Transmitting power	>10mW
Modulation mode	ASK
Quiescent Current	0uA
Operating frequency	433.92 MHZ
Transmitting distance	60-100m(open space , receiving sensitivity : -108dBm)
Encoding type	fixed code, learning code, rolling code
Encoding Chip	PT2262 , EV1527,HCS301
Size	55mm*30mm*13mm

Application :

Widely used in various anti-theft alarms, security systems, Remote controlling devices, motor-driven curtain, roller blind door, garage gate , gate barriers, motorcycle, short-range and long-range wireless remote control products, industrial control products.

FCC STATEMENT :

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the

user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.

RF warning statement:

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
