

Race 10W Wireless Car Charger

Product Information

1. Suction pad for windscreen attachment
2. Locking lever for suction pad.
3. LED charging indicator.
4. Retractable arms to keep your device in place.
5. Adjustable base stand for different size devices.
6. Wireless Charging Zone.
7. Release button for retractable arms.
8. Micro USB charging port.
9. Adjustable ball join for tightening ring.

Installation instructions

- 1. Windscreen Mounting**
Attach the product to your windscreen by lifting the locking lever **(2)** to the up position. Place the Race Wireless Charger in the desired position on your windscreen pushing the suction pad **(1)** flat against the glass. Press down the locking lever **(2)** to lock into place, and check it is securely attached. To remove, simply lift up the locking lever and pull the small tab on the suction pad
- 2. Adjusting the Viewing Angle**
You can adjust the angle by loosening the tightening **(9)** ring of the ball joint on the back of the product. Once you are happy with the viewing angle tighten the ring to **(9)** hold in place.
- 3. Adjust the base to suit your device.**
The base stand **(5)** of the wireless charger is adjustable to suit different sized devices. For larger devices it should be fully extended, and for smaller devices it should be retracted. Adjust the base so the phone sits directly over the wireless charging zone **(6)**. Once the base is correctly adjusted push in the retractable arms **(4)** to hold your device securely in place.

Troubleshooting

- 1. No Charging or Slow Charging.**
Please ensure you are using the supplied power adapter with the Race Wireless Charger. Using other chargers may result in slow charging or no charge at all. If you need to replace the power adapter please make sure it supports QC 3.0 and supports a 12V USB output.
- 2.** For optimum charge speed the base stand should be adjusted so the centre of the phone is aligned to the wireless charging zone **(6)** of Race Wireless Charger.
- 3.** Please ensure that the case on your phone is not affecting the wireless charging by removing it and checking the performance. Some case interfere with wireless charging if they contain metallic material or are overly thick.

Safety Information

- 1.** Do not disassemble or throw into fire or water
- 2.** Do not expose to extreme weather conditions
- 3.** Do not place close to a magnetic strip or chip card as it could cause magnetic failure
- 4.** Please keep charger a safe distance of at least 80cm from any implantable medical devices to avoid medical device interference.
- 5.** This is not a toy and should be kept away from children
- 6.** In the case of the device overheating please disconnect immediately

Technical Specifications

10W Wireless Car Charger

Item No:	JS-WQC-003
Input:	5V-2.1A, 12V-1.5A (18W Max)
Wireless Output:	5V-1A, 9V-1.1A (5W,7.5W,10W)
Operation frequency	114.1-128.4kHz
H-field strength:	22.97dBµA/m

QC 3.0 Car Charger

Input:	DC 12-24V
Output:	3.6V-6V/3A, 6-9V/2A, 9-12V/1.5A

FCC ID: 2AQAE-JSWQC003

This equipment has been tested and found to comply with the limits for a WPC device, pursuant to Part 18 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

NOTE: This equipment has been tested and found to comply with the limits for a wireless power charger, pursuant to Part 18 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

CAUTION: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the product.

Made in China.
