

CHXPC-Q12 Wireless Charger User Manual

Designed in Seattle
Made in China by People We Trust

Thank you for purchasing the Florington Fast Qi Wireless Car Charger, a dual vehicle mounted mobile bracket and wireless smart phone charger.

Please read this manual before using the product and keep it for future reference.

Installation of Charger

Air Vent Installation: Place the securing nut on top of the air vent mount's ball buckle. Connect the ball buckle to the wireless charger and screw in the securing nut. Engage the air vent mount release switch and secure the wireless charger into the air vent.

Windshield/Dashboard Installation: Repeat the following procedure with the sticky mount stand.

STEP 1: PUT ON THE NUT

STEP 2: MOUNTING NUT AND CLIP

STEP 3: TIGHTEN THE NUT

STEP 4: COMPLETE THE ASSEMBLY

Slide the smart phone in between the three phone clamps. The clamps will automatically adjust to the phone's size, securing it instantly.

Connect the wireless charger to the Quick Charge 3.0 Adapter using the micro USB Power Cable. Insert the adapter into a compatible car charge slot.

If it does not charge your phone or charges intermittently, it is likely that wireless sender and receiver are not matched for **the synchronized height**. You will need to **adjust manually the length of bottom arm** (either extend or shorten). The charger will memorize the last position after the adjustment.

Specifications

Input: 5V/2A 9V/2A (Max)
Output: 7.5W (Adaptive) to 10W (Max)

Charging Distance: ≤8mm
Charging Efficiency: ≥75%

FCC Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
