1 Release the Safety Lock

2 Lift Cubo upward from the Camera Holder

Removing the Stand from the Floor Base

1 Open the round Floor Base

2 Press button to release, pull the Stand Element upward

WiFi Connectivity

Make sure your WiFi speed is at least 5Mbps

- Test your connection speed by standing next to your Cubo and heading to <https://fast.com/> while connected to your WiFi.
- If your WiFi speed is less than 5Mbps you may need to contact your Internet provider to improve your internet connectivity.

Arrange a safe crib environment

Clear the crib!

- ✓ Don't add bumper pads to the bed rail, sleep in the same room as the baby, but not in the same bed
- ✓ Avoid using pillows, toys, and blankets, wear a onesie to reduce the chance of accidental face coverage
- ✓ The mattress should be hard enough so that baby's face won't sink in

Sleeping on the back is safest!

Tummy sleeping could lead to indirect suffocation and cause hazards such as reduction in blood oxygen, increase in body temperature, and impact the autonomic nervous system.

Compliance and Precautions

1. Cubo AI Baby Camera is not a medical device and should not be used as a SIDS (Sudden Infant Death Syndrome) prevention tool. This is only a tool for caregivers to monitor their baby's condition regularly. For premature or potentially ill infants, this product should be used under the direction of a doctor or a medical professional. For more details, please refer to the product website or the terms of use and privacy policy on the App.

2. Please install Cubo according to the instructions in the instruction manual. If the Cubo camera and bracket are installed properly, it may prevent unnecessary accidents. Please follow the instructions in the manual.

FEDERAL COMMUNICATIONS COMMISSION INTERFERENCE STATEMENT

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

CAUTION

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC RF Radiation Exposure Statement:

1. This Transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
2. This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment.

This equipment should be installed and operated with a minimum distance of 20 centimeters between the radiator and your body.
