- ⑪. Sound guide hole;
- ⑫. Power charging socket;
- ⑬. Audio input.

# Instructions

## LED light

When the battery is saturated, the power indicator will light four blue LEDs at the same time. As the battery power decreases, the LED will gradually make the three LEDs not light until the last LED is “blinking”, indicating that the battery is not available. The electrical state, when playing only with the battery, will automatically shut down when the battery is low. In this case, you should connect the power adapter to charge it.

## Charging precautions

1. When charging, the blue LED will “cycle flash” in sequence, full of one LED light, and so on. Stop flashing when the battery is saturated (4 blue LED lights, about 5–6 hours full).
2. Support playback when charging, support shutdown charging.
3. When the battery is full, the charging indicator does not flash. Only when the battery level indicator lights only 3 blue LED lights, the indicator will flash.
4. When the battery is too low, it will automatically shut down, please connect the power supply in time.

## USB port

Insert the U disk with the copied file into the USB port of the product. According to the rules of post-plug priority, the player will automatically switch to USB mode and play.

## RGB stage light on/off; Mode switch button

1. Touch  to turn on/off the RGB stage light, often press the mode switch (Bluetooth – Audio Input).
2. Press the mode switch button on the remote control – “M” button to switch (Bluetooth – Audio Input).

## Volume plus button/Previous song button

Press  and hold the button for the volume and touch the previous button for the track.

## Volume down button/Next button

Press  and hold the volume down button and touch the next button for the track.

## Microphone interface

This product only supports U-segment wireless microphone. The microphone sound can be adjusted by the MIC+/MIC– button on the remote control.

## Sound mode

Select the sound mode (standard–pop–rock–jazz) by the corresponding button on the remote control, the default is the standard mode state.

## Audio input

Stereo audio input interface for easy connection to audio and video products such as computers, digital, music players, mobile phones, etc.

## Bluetooth connection

1. Boot into Bluetooth mode, the default is to enter Bluetooth mode;
2. Turn on the Bluetooth function of your mobile device (mobile phone, computer, etc.). Search for the Bluetooth device “LP–HiFi”;

No sound in the microphone	1. Check if the MIC volume is adjusted to the minimum and adjust to the appropriate volume. 2. Check if the receiver and microphone switch are turned on. 3. Check the microphone battery and replace if necessary 4. Check if the receiver has power and charge if necessary

**FCC Statement**

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception,

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**FCC RF Radiation Exposure Statement**

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
