The keyboard doesn't support the Win+Alt keys.

Pairing Instructions

Pairing with tablets and cell phones

- Turn on the keyboard's power switch. The green status light will activate for 5 seconds and then shut off.
- Press the first key to begin pairing mode. The Bluetooth indicator light will blink blue.
- Go to your "SETTINGS" screen on your tablet with Bluetooth enabled, and add the keyboard to Bluetooth list and search for the keyboard device.
- Select "Keyboard" should appear.
- Select "Keyboard" on your device, type the code on the keyboard and press the key to confirm you can pair to your device.

Pairing with a computer

- Please make sure your computer has Bluetooth capability.
- Turn on the keyboard's power switch. The status indicator will light up for seconds and then turn off.
- Press the first key to begin pairing mode. The status indicator will start flashing. This keyboard is now ready to connect to your computer.
- Go to the Bluetooth setup menu on your PC for Bluetooth (Preference on a Mac) and start searching for the keyboard devices. Add the keyboard to your Bluetooth device list or a Mac OS.
- Select "Keyboard" on your PC, type the code on the keyboard and press the key to confirm you can pair to your PC.
