

Wireless Door Bell

manual

Please read the instructions carefully before use.

Product Features

1. Wireless transmission without wiring
2. Straight line transmission distance up to 130 meters
3. 4-level volume adjustment mode
4. 38 music choices
5. Intelligent learning code function

Technical Parameters:

1. Rated voltage: AC 220V 50HZ
2. Volume: 25-85 decibels
3. Working frequency: 433.92MHZ
4. Standby power consumption: <0.5W
5. Launcher: self-generated
6. Transmit power: <10mW
7. Receive host plug-in power supply

Installation Notes

1. Remove the transmitter (eg 1)
2. Peel off the side of the double-sided tape and stick it on the back of the transmitter. Press firmly (eg 2)
3. Remove the other side of the double-sided tape, select the installation position of the transmitter and clean it (try not to be close to iron and metal objects, metal objects will affect the wireless signal), and press the wall for more than 30s to make it securely fast (such as 3)
4. Plug the receiver into a regular household outlet.

5. Press the receiver's music button to select the appropriate volume and music

- Precautions:
- Do not disassemble the internal precision components of the transmitter module
- Actual remote control distance and different usage environments have changed
- Proper use of this product can effectively extend the service life
- This product is a wireless communication electronic product, please

pay attention to moisture and drop.

- This product is powered by commercial power. Please pay attention to safety when using it to avoid electric shock.

FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- - Reorient or relocate the receiving antenna.
- - Increase the separation between the equipment and receiver.
- - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- - Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following

two conditions: (1) This device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.
