Altro Smart Lock Inner Unit

The Altro Smart lock's inner unit is one which is installed inside of the premises.

When a buyer buys the Altro Smart lock and installs the lock at their door, the lock's inner unit resides on the inside.

The Altro Smart lock inner unit has:

- a) The Battery Unit – the Altro Smart lock operates using rechargeable Li-ion battery. The inner unit of the lock has space provided to insert the battery and make the Altro Smart function. It also provides a charging point through which the battery pack can be charged without taking it out using the USB cable.

- b) Latch Knob – The latch knob is used by the end user to lock or unlock the lock manually from inside.

NOTE: This equipment has been tested and found to comply with the limits for a

Class B digital device, pursuant to part 15 of the FCC Rules. These limits are

designed to provide reasonable protection against harmful interference in a

residential installation. This equipment generates uses and can radiate radio

frequency energy and, if not installed and used in accordance with the instructions,

may cause harmful interference to radio communications. However, there is no

guarantee that interference will not occur in a particular installation. If this

equipment does cause harmful interference to radio or television reception, which

can be determined by turning the equipment off and on, the user is encouraged to

try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the

- receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help

Changes or modifications not expressly approved by the party responsible for compliance

could void the user's authority to operate the equipment.

This device complies with Part

15 of the FCC Rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may

cause undesired operation.
