

Module Integration Guide and Regulatory Compliance Addendum PAN

The following guidance is mandatory when integrating the radio module with the following identifications

FCC: 2AQVA-ONVAPAN51915

IC: 24318-ONVPAN52915

1. This radio module is certified under limited modular approval. It is designed for integration with host products of the grantee of the module only. It must be integrated in a way maintaining a separation distance between the antenna in the module to all metallic housings or other PCBs of at least 1 cm.
2. It may only be combined with other radios in a host when following current FCC guidance for integration of multiple radios.
3. Each individual host product that is integrating the above module must be marked with "Contains FCC ID: 2AQVA-ONVAPAN51915: and "Contains IC: 24318-ONVPAN52915"
4. Changes or modifications not expressly approved Kimberly Clark could void the user's authority to operate the equipment.
5. Each individual host product that integrates the module still requires SDOC (supplier declaration of conformity) for the unintentional emissions to part 15B and ICES-003.

Kimberly-Clark

PROFESSIONAL*

6. Each individual host product that integrates the module shall be marked with the following statements or contain these statements in the manual if this is not practicable

This device complies with Industry Canada license-exempt RSS 210. Operation is subject to the following two conditions: (1) this device may not cause interference and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Cet appareil est conforme avec Industrie Canada exempts de licence standard RSS 210. Son fonctionnement est soumis aux deux conditions suivantes: (1) cet appareil ne doit pas provoquer d'interférences et (2) cet appareil doit accepter toute interférence, y compris celles pouvant causer un mauvais fonctionnement de l'appareil.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved Kimberly Clark could void the user's authority to operate the equipment.
