Statement of W-CDMA and LTE Function Disable

Product: Feature phone

Model No.: F-01M

FCC ID: 2AQYEFMP172

W-CDMA Band I, VI, XIX, LTE Band 1, 19.

The above device has capabilities of W-CDMA Band I, VI, XIX, LTE Band 1, 19. These functions cannot be activated by the user in case the mobile phone is used or switched on in the United States. These functions can also not be activated by the user in case the mobile phone is outside of the service area of a mobile phone network while switched on. In both cases, these functions are also not activated automatically.

When the mobile phone is inside the service area of a mobile phone network, it will search all available mobile phone networks. These functions will not switch on automatically unless the mobile phone detects networks having W-CDMA Band I, VI, XIX, LTE Band 1, 19 or if the mobile phone detect network having W-CDMA Band V, LTE Band 5. Therefore these functions are never activated in the United States where there is no commercial network for those services on W-CDMA Band I, VI, XIX, LTE Band 1, 19. While searching for the network the mobile phone does not transmit any signal.

In case you have any question, please contact us,
