

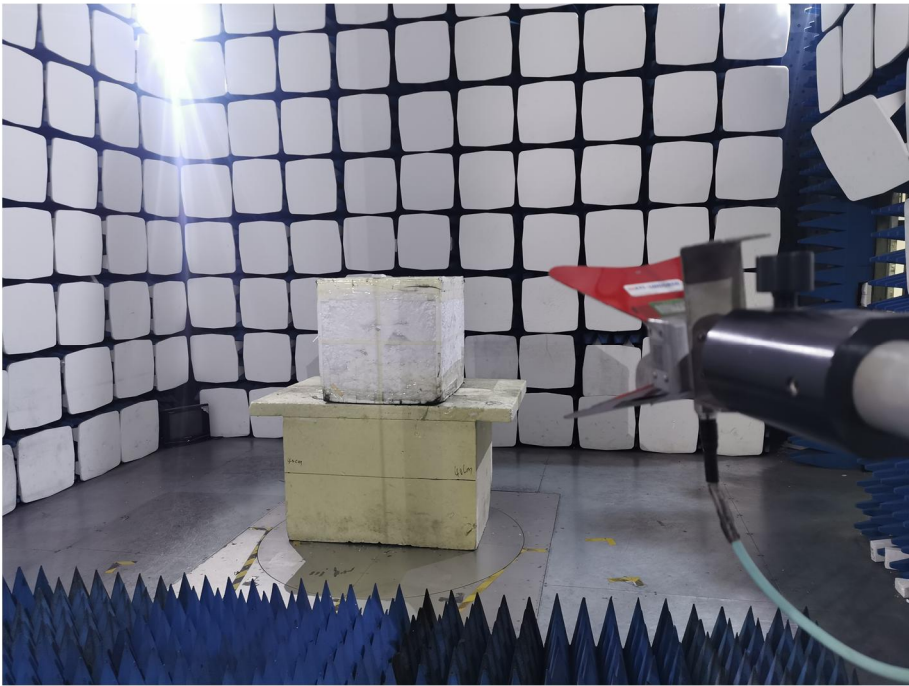

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Radiation Emission Test Setup (Below 30MHz)	 A photograph of a radiation emission test setup for frequencies below 30 MHz. The test chamber is lined with white, square-shaped electromagnetic absorbers. A yellow, rectangular test fixture is positioned on a circular turntable in the center of the chamber. A metal frame is visible in the foreground, and yellow and black striped safety tape is on the floor.
Radiation Emission Test Setup (30MHz to 1GHz)	 A photograph of a radiation emission test setup for frequencies from 30 MHz to 1 GHz. The test chamber is lined with white, square-shaped electromagnetic absorbers. A yellow, rectangular test fixture is positioned on a circular turntable in the center of the chamber. In the foreground, there is a metal frame with several vertical rods, likely for mounting antennas or sensors. Yellow and black striped safety tape is on the floor.

Radiation Emission Test Setup (1GHz to 18GHz)	 A photograph showing a radiation emission test setup. A white, rectangular device is placed on a yellow wooden crate. The device is surrounded by a large, white, square-patterned absorber structure. A red antenna is visible on the right side of the setup. The floor is covered with blue, pointed absorbers.
	 A close-up photograph of the white device, which is a remote control, resting on a yellow wooden crate. The remote has buttons labeled 'OFF', 'MED', 'LO', 'H', and 'M'. The background shows the white, square-patterned absorber structure.
