## VM LIGHT&PLAY 3

Seamlessly integrated with LED light boxes, the VM LIGHT&PLAY 3 brings dynamic content such as videos or smart mandates.

### VARIOUS CONFIGURATIONS

It is available in two versions: 21.5-inch LCD screen with a brightness of 2000 nits and 24-inch in 1500 nits. Both formats can be installed in portrait and landscape.

### EASY MANAGEMENT OF YOUR CONTENT

Thanks to our **Visible Display™** solution, you can easily create a playlist from any browser and send it via Wi-Fi directly to your VM LIGHT&PLAY 3 screen.

**Visible Display™** will allow you to easily manage and change the content you want to display on your screens depending on your sales needs & company news.

### COMPATIBILITY

VM LIGHT&PLAY 3 is compatible with most of Vitrinmedia's fixation systems: VM CABLE, VM WALL, VM MOBILE STAND EASY CLIP, VM BOX PREMIUM, VM Z LIGHT&PLAY and VM DOCK. It can also be installed on a standard VESA mounting system (200x200mm).

Warning:  
Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user ' s authority to operate the equipment.

NOTE:  
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Statement:  
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The equipment complies with FCC Radiation exposure limit set forth for uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
