1.Important safety instructions

Danger

- To avoid hearing damage, limit the time you use the earphone at high volume and set the volume to a safe level. The louder the volume, the shorter the safe listening time is.

Be sure to observe the following guidelines when using your earphone.

- Listen at reasonable volumes for reasonable periods of time.
- Be careful not to adjust the volume continuously upwards as your hearing adapts.
- Do not turn up the volume so high that you can't hear what's around you.
- You should use caution or temporarily discontinue use in potentially hazardous situations.
- Excessive sound pressure from earphones and earphone can cause hearing loss.
- Using the earphone with both ears covered while driving is not recommended and maybe illegal in some areas while driving.
- For your safety, avoid distractions from music or phone calls while in traffic or other potentially dangerous environments.

Caution

- Do not expose the earphone to excessive heat.
- Do not drop your earphone.
- Do not allow your earphone to be submerged in water.
- Do not use any cleaning agents containing alcohol, ammonia, benzene, or abrasives.

- If cleaning is required use a soft cloth, if necessary dampened with a minimum amount of water or diluted mild soap, to clean the product.
- The integrated battery shall not be exposed to excessive heat such as sunshine, fire or the like.

2. Wireless Headphone instruction

3. How to use your earphone

Note: Make sure the earphone is fully charged before using it for the first time!

Pairing for the first time:

Press and hold the power button until flash red and blue lights ,then wait for 1 minute to stabilize and only flash blue light. Finally you can pair them on the phone.

Note: If they still flashing red and blue lights, maybe connected only one headset when you paring your cell phone (and you will never paring the two headsets in the future)

Reset your headset:

At the second start, press and hold the power button until flash the red and blue lights, then restore the default (such as the first pairing).

If your cell phone have paired this BT headsets before , please follow the below operations:

1. Connect them on the phone directly.
2. Unable to display device if you do not delete previous BT information that you have repaired.

6. Notice

This product has IPX5 waterproof function, but please don't immerse them into water for a long time

The call sounds only from one earbud (stereo mode), you will find all of the Wireless headphones have this issue

If the sounds is not very stable(always in and out), please try to keep it where is no signal interference and stay away from the wifi router and other BT devices to avoid other device that use 2.4 GHZ signals to interfere with this product. Because the main earbud needs to receive and transmit signals at the same time, so it easy to be disturbed (all the true wireless headphones will have this issues)

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
