10.Q&A

Q: Does this device work in both ear?

A: Yes, you can flip around, this device can be easily adapted to either ears.

Q: Why do I have crackling noise?

A:Bluetooth is a radio technology that is sensitive to objects between the headset and the connected device, Ensure the headset and the connected device are within range(up to 10meters or 33 feet).

Q: What is the range of the headset?

A: This Bluetooth Headset supports the following maximum ranges: 10m/33ft

Q: Why can't I hear anything?

A: You might need to increase the speaker volume, or ensure

that the headset is connected to a device.

Q: Why couldn't my headset connect with the device?

A: Check your device's Bluetooth menu and delete/forget the headset. Re-connect the headset to your Bluetooth device following the Bluetooth connection instructions(Section 5).

Q: How to take care of my headset?

A: Recommend to power off the headset and put it in storage case when not use Avoid storage at extreme temperatures (above 35°C/95°F or below -20°C/-4°F). It will shorten battery life and may affect headset operation.

Do not expose the headset to rain or other liquids.

Wish you have a happy experience on purchasing and using, looking forward to serving you.

Thank you.Best wishes for you!

FCC ID: 2ARGMKMAIQ

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.

This device complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter
