## power bank wireless charging user manual

Model Name: L24W

\*Please read this manual carefully before use  
\*Different models, different graphics, pictures for reference only

### Instructions

### Specifications

| Item                  | Spec  |
|-----------------------|---|
| Input                 | DC5V-2.0A   |
| Output1               | DC5V-2.1A   |
| Output2               | DC5V-1.0A   |
| Wireless Output       | 5W  |
| Transmission distance | ≤8mm  |
| Support Equipment     | equipment supporting QI wireless charging standards |
| Operation             | 0°C-45°C  |
| Cell Type             | Polymer Lithium Battery                             |

### Features:

- Storing electricity wherever you are. Used outside and inside.
- Intelligent conversion system, High performance and low loss
- Long life battery, can be charged and discharged more than 500 times
- More than 8 hours' aging test to ensure good quality of each product.

### Accessories

|                |    |
|----------------|----|
| 1. Power Bank  | X1 |
| 2. User Manual | X1 |
| 3. Micro Cable | X1 |

### Operating guide:

#### ► Recharge the mobile power supply

This product supports the Micro input interface. Please connect the Micro data line mobile power to the power supply. When the charge is blue, the blue light flashes, and the 4 lights are always bright.

#### ► Connect the data line to the cell phone

1. please connect the data line to the USB port, switch on the short switch output, the blue light is always bright, and display the power of the mobile power, and the mobile phone enters the charging state.
2. 30s does not automatically switch off the phone output, or even close the output directly by pressing the 2 switch.

#### ► QI wireless to mobile phone charging (wireless output and USB output synchronous open or close)

With QI wireless charging function, the mobile phone is placed in the center of the mobile phone, and the mobile phone is switched on. The cell phone is connected to the charging state, and the wireless output is closed by the two switch, and the charge is stopped.

| Capacity  | While charging the power bank |        |        |        |
|---|-------------------------------|--------|--------|--------|
|   | LED1                          | LED2   | LED3   | LED4   |
| <25%  | Flash                         | OFF    | OFF    | OFF    |
| 25%-50%   | bright                        | Flash  | OFF    | OFF    |
| 50%-75%   | bright                        | bright | Flash  | OFF    |
| 75%-100%  | bright                        | bright | bright | Flash  |
| 100%  | bright                        | bright | bright | bright |
| While the power bank is charging the mobile phone |                               |        |        |        |
| Capacity  | LED1                          | LED2   | LED3   | LED4   |
| <3%   | Flash                         | OFF    | OFF    | OFF    |
| <25%  | bright                        | OFF    | OFF    | OFF    |
| 25%-50%   | bright                        | bright | OFF    | OFF    |
| 50%-75%   | bright                        | bright | bright | OFF    |
| 75%-100%  | bright                        | bright | bright | bright |

### ▲ [Caution]

- Do not drop or bump, do not put it into the fire, hot temperature and water.
- Please use the proper charger or adapter for it, if have any deformities or corrosion, please stop using!

Warning: improper use may cause product damage and may harm yourself! keep it away from the child!

### FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the condition that this device does not cause harmful interference (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.

-- Increase the separation between the equipment and receiver.

-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

This equipment should be installed and operated with a minimum distance of 20 centimetres between the radiator and any person.

FCC ID: 2ARK4-L24W
