WXCV01 Wireless Backup Camera

Our KENNA Wireless Backup Cam (Model: WXCV01) package includes a backup camera and a vehicle display. When using, turn on the switch of the on-board charging plug of the display, so that the backup-camera will transmit a wireless live-video signal to the monitor in the car. Then, the image of the rear of the car will be successfully displayed on your screen.

When the battery power is less than 5%, the LED indicator light on the right side of the backup camera will show red. At this time, take out the charger (included in the package) and plug it into the charging plug located on the right side of the backup camera. Then, the LED light will be on blue color after the charging plug is inserted. The light is gone when the charging is completed.

PACKAGE INCLUDES:

- 1x Wireless Backup Camera (12.7in x 6.9in x 1.6in)
- 1x 4.3" Monitor (5.1in x 4.5in x 0.8in)
- 1x 13ft USB Charging Cable
- 1x 5V 2A Power Adapter
- 2x License Plate Self-Tapping Screw
- 4x License Plate Machine Screw
- 1x Instruction Manual
- 1x Quick Install Guide

FCC Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
