

myUpTech AB

September 5th, 2019

TUV Rheinland of North America
1279 Quarry Ln., Suite A
Pleasanton, CA 94566

To Whom It May Concern:

myUpTech AB has two models of the HMI-L; hardware version 10000033 and hardware version 10000070. The hardware version called out on all EMC and wireless test reports, submitted by TUV Rheinland, is 10000033, however it is representative of both models. The only difference between these two models is the plastic face plate. Assembly 10000033 receives face plate P/N: 036932 and assembly 10000070 receives face plate P/N: 236005. Face plate 036932 has a tab to cover up the third position of the S1 switch, and face plate 236005 does not. The differences are highlighted below.

Hardware Version 10000033

Hardware Version 10000070

Equipment: Independently mounted, temperature and humidity sensing electronic control

Model: HMI-L

HVIN: 10000033 (and 10000070)

IC: 24959-10000027

Sincerely,

Kara Wills
