

FCC ID: 2AS3AH18

Model: H18

Product name: Light night bluetooth speaker

Product specification

Technical parameters

Output power: 5W charging input: 5V/ 1-2a transmission distance: 10m

Keystroke operation

1. Long press the button  for on/off, enter night light mode, and breathe through colorful lights. If TF card is inserted, enter the playback mode of TF card. If the TF card is not inserted, enter bluetooth standby mode. Short press the button  to switch between play and pause.

2. Short press the button  to reduce the volume, long press the button  to switch to the previous track.

3. Short press the button  to increase the volume, long press the button  to switch to the next track.

4. Press the button  to select a single light color, and press the button continuously to the red light to enter the breathing state of the colorful light cycle again. Long press to switch bluetooth and TF card modes, and voice prompt is available for switching.

Bluetooth connection and pairing

1. After the night light enters bluetooth mode, search available devices. When the available devices display H18 characters, it means that the night light bluetooth speaker has been searched.

2. After successful bluetooth connection, users can switch between bluetooth and TF card mode by themselves. When switching to bluetooth mode again, bluetooth keeps the connection by default but is in the state of play suspension. Short press the button  or operate at the terminal for playing.

FCC Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the

instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.

-- Increase the separation between the equipment and receiver.

-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
