Instruction manual

USB-C mouth Input	5V/3A, 9V/2.22A
Wireless Charge MPP	5W/15W
Maximum Output	MPP 15W

Brief introduction

• This product realizes short-distance wireless transmission of electric energy through magnetic induction, which can charge the device, and adopts the technical working morking method of fixed frequency modulation duty cycle. The receiving and device that meets the Qi2.0 MPP standard can be charged with this product, and supports fast wireless charging, and supports fast wireless charging, applicable to devices with iphone12 or above.
• This product has wide operating voltage (DC 5V-9V) which can adapt to most adapter and fast charge adapter.

Basic instructions for product operation

• When the product is connected to the power supply. At this time, the device to be charged will start wireless charging.
• Foreign body Detection function (FOD): When metal objects such as coins and keys are placed on the coil of the product in standby state, and stop discharge.

How to use

Charging Your Phone

Precautions

• Please read this instruction manual carefully before using this product.
• The mobile power supply shall be used within the charging and discharging rated specification specified in the specification, and the ambient temperature during charging and discharging shall be between 15 ℃ and 35 ℃.
• Please keep this product and related accessories well away from children.
• Keep away from inflammables and explosives when using the product.
• Please use the specified charger and approved accessories. Unauthorized power charger and accessories may damage your electronic products and mobile power host.
• Please use the mobile power supply properly according to the local laws, regulations and restrictions. In case of unauthorized situations, such as aircraft landing or near medical instruments, you should avoid charging and turn off your mobile phone or other electronic products immediately to avoid interference.
• The product may be damaged due to improper operation during transportation. If the product is found to be abnormal, such as package damage, battery package deformation, smell of electrolyte and leakage, stop using the product immediately.
• Do not put the disused mobile power into the dustbin, but put it into the special battery recycling bin.

Disclaimers

The equipment damage and safety problems caused by any of the following points are not within the scope of the warranty and responsibility of manufacturer.

• Damage caused by not following the operation instructions and safety warnings in the instruction manual.
• Damage caused by operation in harsh environment beyond the instruction manual.
• Damage caused by storage conditions not meeting the requirements of this instruction manual.
• It is forbidden to apply or operate beyond the conditions described in this instruction manual. If the customer needs, he / she should contact manufacturer technology in advance. In this case, additional experiments are required to verify the performance and safety.

After-sale service

The product shall be valid within 12 months from the date of completion or delivery.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-- Reorient or relocate the receiving antenna.
-- Increase the separation between the equipment and receiver.
-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-- Consult the dealer or an experienced radio/TV technician for help.
FCC Radiation Exposure Statement
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20 cm between the radiator and your body.
