

Set up your device

1. Download the device app

Download the latest version of the app from the app store.

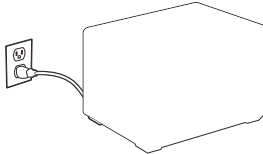

2. Install the device

Install the device as directed in the User Manual. Do not install it over a heat-producing appliance.

3. Plug in the device

Plug the device into a power outlet that is grounded.

4. Follow instructions in the app

In the device app, tap the Devices icon in the lower right. Follow the on-screen instructions to set up your device.
