

Solder Board-Component View 11	 A photograph of a small electronic component, likely a sensor or microcontroller, mounted on a green printed circuit board (PCB). The component is positioned next to a black ruler with white markings, which is placed on a blue fabric background. The ruler shows measurements in millimeters (0 to 100) and centimeters (0 to 10). The component has a white ribbon cable attached to it. The PCB is populated with various surface components, including a large square chip and several smaller components.
Solder Board-Component View 12	 A photograph of the same electronic component from a different angle, showing the underside of the PCB. The component is again positioned next to the same black ruler on a blue fabric background. The underside of the PCB shows the solder pads and the reverse side of the components. The white ribbon cable is still attached. The component is labeled with "LCC11" and other markings.
