

TECHNICAL DATA

Battery: 3.7V/2400mAh, Li-ion
(Built-in rechargeable)

Charging time: 3 hours

Operating time: 10 Hours / by 50% volume

Power supply: 5 V DC, 1 A

Operation Frequency: 2402 GHz - 2480 GHz

Bluetooth version: 5.3

Includes Microphone, USB Charging cable
and AUX cable

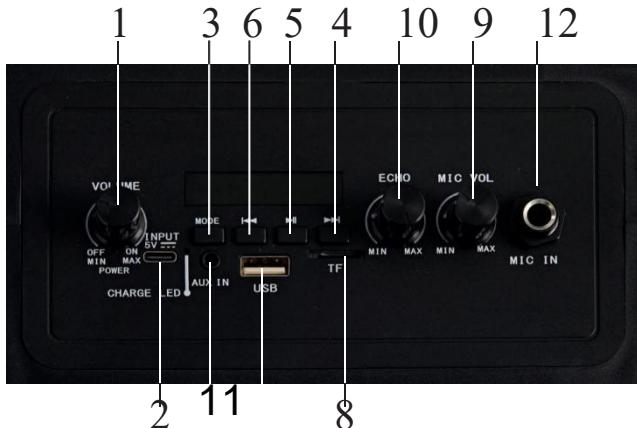

Bluetooth pairing name: IVSP2074

Warning: To prevent possible hearing
damage, do not listen at high volume
levels for long periods.

OVERVIEW

1. Turn on-off/volume+-
2. Charging USB-C
3. Change mode: Bluetooth, FM, USB,TF
(short press)/changing LED mode (Long
press)
4. Next track

you like.

Charging: Connect the speaker to a DC
5V-500mA USB adapter with a USB cable
connection, and (2) plug it into a (100-240V)
power socket. The red light will go on while
charging, and the red light will go off when
it is fully charged. (You can also connect it to
your PC, Power bank, and other devices that
can deliver the appropriate power over USB)

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
