Blinking (fast) Green Light	Error (No Paper, Cover is open, Overheat)
Red Light	10% Power left
Blinking (slow) Red Light	5% Power left
Blinking (fast) Red Light	

04. Instructions for use

After installing the label roll for the first time or replacing the label roll, remember to reposition the label (Step No. 05).
If you do not reposition the label (Step No. 05), the first label you print will be printed incorrectly (missing contents, not aligning to the center, etc.).
Continuous labels do not need repositioning. You only need to pull the label to the opening of the Label Maker.

05. Downloading the App

You need to connect the Label Maker through the Print Master app. In compliance with Google's requirement, Android phones must enable GPS (Location Services) before using Bluetooth.

06. Connecting the Label Maker

In compliance with Google's requirement, Android phones must enable GPS (Location Services) before using Bluetooth.
Before connecting to your device in Print Master, please make sure your printer is turned on and your phone's Bluetooth is on.

11. FCC Caution

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-Reorient or relocate the receiving antenna.
-Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.
*RF warning for Portable device:
The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
