Remote control

Model:HK-19-01

FCC ID:2ASWE-HK-19-01

user manual

Launch indicator

The remote controller uses a surface acoustic filter to transmit signals at 433MHz. When the A button or B button or C button is pressed, the transmitting indicator flashes to indicate that the carrier signal of the 433MHz frequency is being transmitted. The A key, the B key, and the C key generate different key values.

When the button A button or the B button or the C button is pressed for more than 8 seconds, the transmission signal is automatically stopped, and the transmission indicator also stops blinking, aiming to prevent the card key.

Product parameters

- 1, using CR2032*2 battery power supply DC3V
- 2, modulation method: ASK
- 3, working current: 10mA
- 4, working frequency: 433MHz

FCC Statement

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
