Antenna Information

The Vitls Tego (Product Code -VT-F-010-V2) utilizes a Molex 47948-0001 antenna. The antenna is directly soldered to the main board of the Tego, next to the nRF52840 transceiver IC. No other antenna can or will be used, other than the Molex 47948-0001 soldered on to the Tego during production.

The antenna is a 2.4 GH SMD On-Ground Antenna, with an absolute peak gain of 3.7dBi.
