Cover Letter

To whom it may concern,

The Vitls Tego (Product Code -VT-F-010-V2) is a wireless wearable vital sign monitoring device that communicates using a 2.4Ghz Bluetooth LE radio. This is the third revision of the Vitls Tego, which now uses a Nordic nRF52840 transceiver IC and a Molex 47948-0001 +3.7dBi SMD antenna. The Vitls Tego operates with a single configuration, in which it connects to a companion device and transmits notifications containing vital sign, motion, and flag messages.

We request an original FCC certification and submit results from tests conducted by Element Materials Technology Portland - Evergreen Inc., (ELEMENT). Tests were conducted following FCC 15.247:2022.

Sincerely,

A handwritten signature in black ink, appearing to read "ME".
