RE: Bold Type and Renovia Inc.

Bold Type Consulting, LLC is contracted as a critical supplier to perform design and development activities on behalf of Renovia Inc. Bold Type is responsible for the creation of the *leva-02* Design History File (DHF) and Device Master Record (DMR), which are reviewed and approved by both parties and are currently stored in the Bold Type Quality Management System. Renovia has authorized Bold Type to submit DHF and DMR documentation to Renovia suppliers and certification houses, as needed, on Renovia's behalf.

If you have any additional questions, please do not hesitate to reach out to me.

Thank you,

Jennifer Fitzgerald
