Application for Audit Mode

We hereby apply for audit mode, since the original FCC 15.247 test report covering WLAN 2.4 GHz and MPE report contains wrong antenna gain regarding 2.4 GHz band

Explanation:

Original reports mention a maximum antenna gain of 2.4 dBi for WIFI 2.4 GHz. This was corrected by the manufacturer so that the antenna gain got higher to 4.3 dBi.

New FCC 15.247 test report and MPE calculation have been issued and are joined to this letter

Thank you for your attention in this matter.

Yours Sincerely,

A handwritten signature in blue ink that reads 'Imad Hjije'.

Imad Hjije
