

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the disassembled components of an Electronic Under Test (EUT). On a blue background, there is a white plastic housing with a circular opening, a white plastic back cover, and a green printed circuit board (PCB) with various electronic components. A black ruler with white markings is placed horizontally and vertically for scale. The ruler markings are in millimeters, with the horizontal ruler showing 0 to 100 mm and the vertical ruler showing 0 to 100 mm.
Solder Board-Component View 1	 A photograph showing a close-up view of the green PCB component. The board is populated with various electronic components, including integrated circuits, resistors, and capacitors. Two white wires are soldered to the board. A black ruler with white markings is placed horizontally and vertically for scale. The ruler markings are in millimeters, with the horizontal ruler showing 0 to 100 mm and the vertical ruler showing 0 to 100 mm.

Solder Board-Component View 2	 A photograph showing a green printed circuit board (PCB) with various electronic components, including a microcontroller and several resistors. The PCB is connected to a black rectangular component with two large, white, oval-shaped coils. The assembly is placed on a blue textured surface next to a black ruler with white markings in millimeters and centimeters.
Solder Board-Component View 3	 A photograph showing the same green PCB and black component assembly as in View 2, but from a different angle. The PCB is connected to the black component via two thin, white, twisted wires. The assembly is placed on a blue textured surface next to a black ruler with white markings in millimeters and centimeters.

Solder Board-Component View 4	 A photograph showing a small green printed circuit board (PCB) component mounted on a black solder mask. The component is positioned near a blue circular solder pad. A black ruler with white markings is visible in the background, showing measurements in millimeters. The component has several surface components, including a small black chip and several resistors.
Solder Board-Component View 5	 A photograph showing a small green printed circuit board (PCB) component mounted on a black solder mask. The component is positioned near a blue circular solder pad. A black ruler with white markings is visible in the background, showing measurements in millimeters. The component is labeled "WS7-Pro_V1.1" and features a USB-A port and several surface components.
