Factory Reset

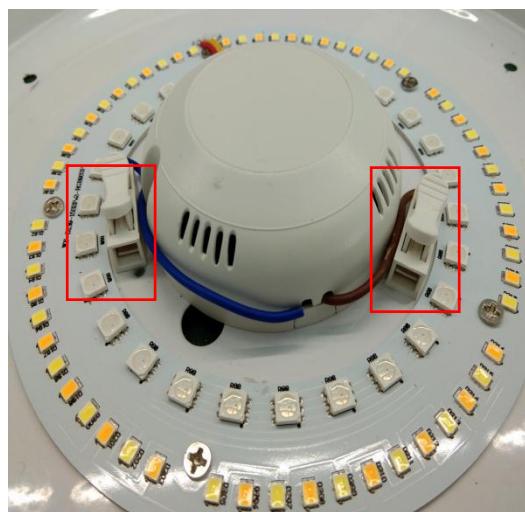

Turn on and off the lamp 5 times. Hold for 2 seconds when the lamp is turned on or off. For the 5th time, hold the turn-on mode for about 5 seconds. If the light blinks, which means the lamp is reset successfully.

Installation

1、Installing ceiling

Install the ceiling and turn on the power switch.

Use quick-connect terminal wiring. Turn the mask open, insert the pre-wired terminals into the quick-connect terminals, then fix the ceiling lamp, a peripheral switch, and finally install the top cover. that's it.

Attention

- 1、Pls insure the power is turned off when installing, removing or inspecting the ceiling.
- 2、Pls don't install the ceiling to dimmable appliances in case of damaging the ceiling (For example, dimmable desk lamp).
- 3、Pls don't use it in a damp environment
- 4、It is not recommended to use the ceiling in a narrow or sealed space in case of losing signals or bad heat dissipation.

This product is compatible with the smart platform and can be controlled by “Smart Life APP”, supporting smart voice control such as Amazon echo, Google Home, etc. Simplified steps to install App on your smart device and pair with Amazon Alexa, Google Assistant using Smart Life App on Apple Store/Google Play Store Compatible with any smart phone or including any Android and Apple device.

How to connect Smart Device to Wi-Fi network

1. Download Smart Life from  or . Download or scan the QR code and install the Smart Life App for either IOS or Android. Once downloaded, the app will ask you to register your device. Enter your phone number or email whichever one makes you feel comfortable and select the country you live in. If phone number is selected you will receive a text with a registration code. If you choose email you will then create a password.

Android

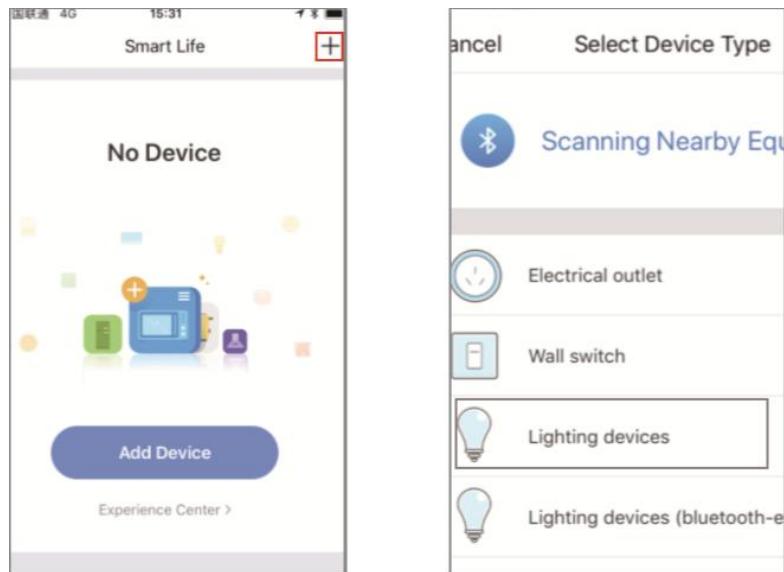

IOS

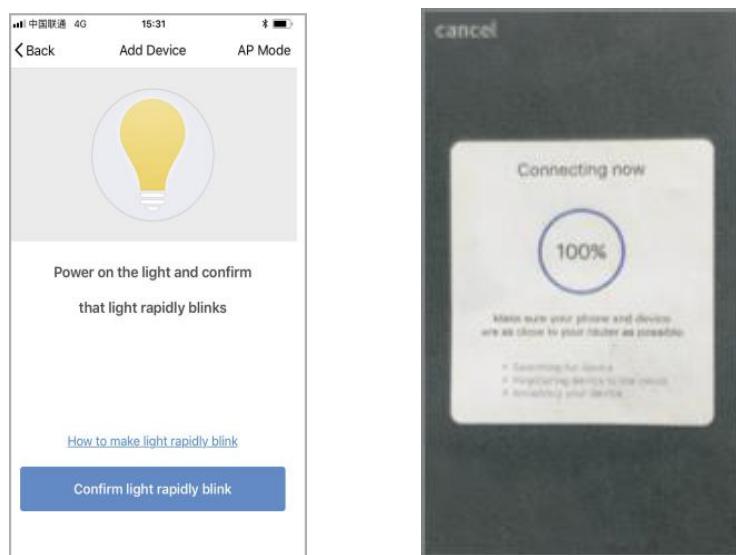

Quick Mode Configuration

1. Make sure quick mode configuration is initiated: the indicator light blinks blue rapidly(twice per second). If it blinks blue slowly(once every 3 seconds), press and holds the power button on the Mini Smart Light for 6 seconds until the indicator light blinks rapidly.

2. Tap the icon “+” on the top right corner of “Smart your smart life” , choose your device type and enter into “Add Device” .

3. Follow the in-app instructions to connect the Smart Light to your Wi-Fi network.

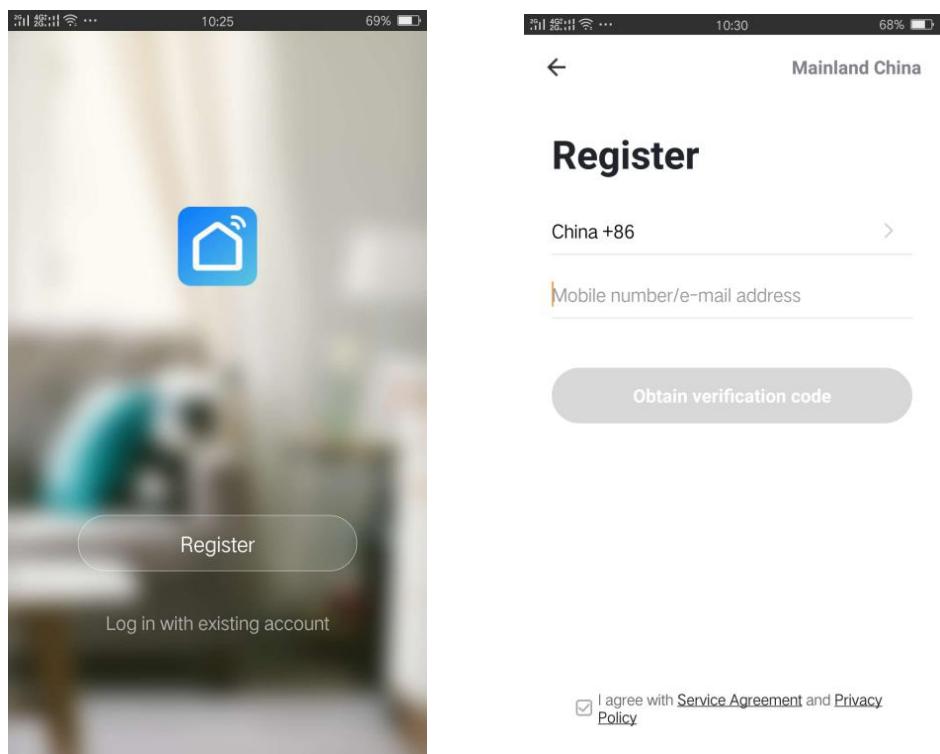

4. Once connected, the App will prompt the connection, and click “Done” .

5. Now you can control the Mini Smart Light through Smart Life App.

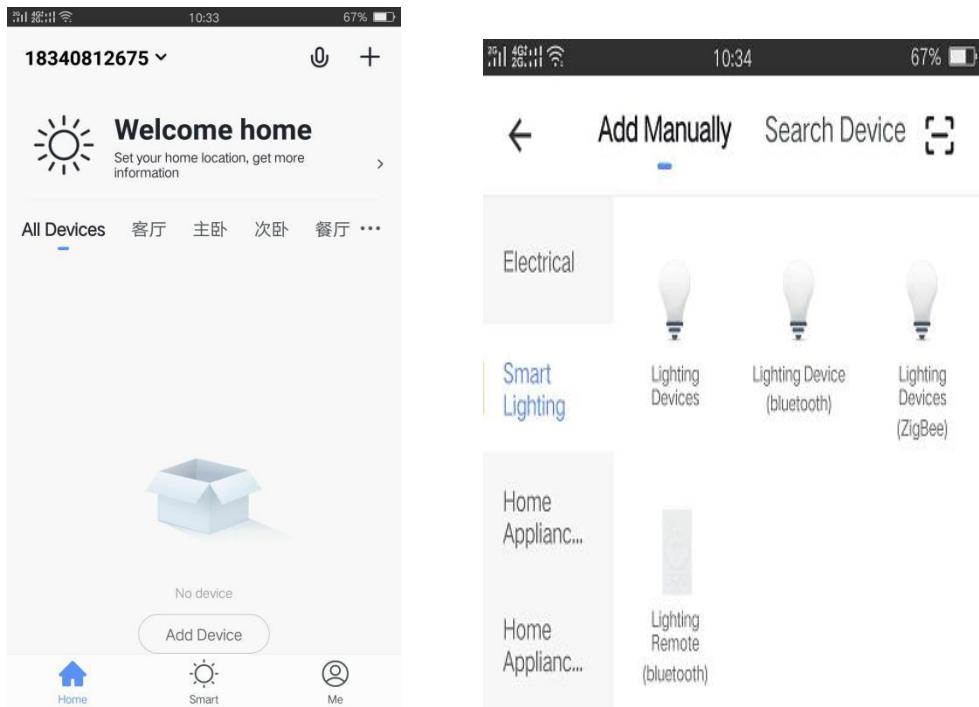

6. Once the configuration is completed successfully, the indicator light will turn to solid blue and the device will be added to the “Device List”.

Use your phone to control your lights

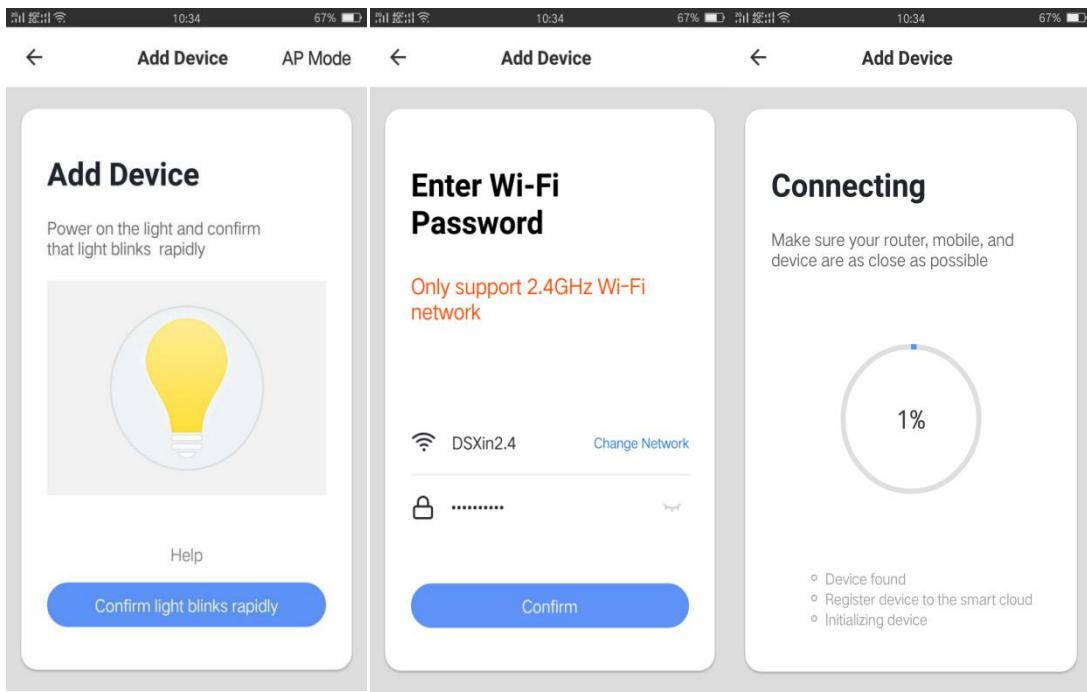

1、Download the smart life app, click to enter the app, log in or register an account.

2、Click Add Device and select Smart Lighting---Lighting Devices.

3、Switch the bulb quickly 3 times, and turn it on for the fourth time. The bulb will flash. Now you can click on Confirm light blinks rapidly on the app.

4、connect to the network, smart life APP will find your lights, when it reaches 100%, you can use your mobile phone to control your light bulb. For your convenience, you can give your own light bulb a name , like: bedroom light.

How to connect Smart Device to Amazon Alexa

1. Launch Smart Life App, sign in your account and make sure Mini Smart Light is in the device list.
2. Modify device name so that Alexa can easily recognize, such as Living room Light, Bedroom light. etc.
3. Minimize Smart Life App, then launch the Alexa APP and sign in your Alexa account and make sure you have at least one Alexa voice-controlled device installed like Echo, Echo dot, etc.
4. In the upper left corner of the Home page, click “Home” the button to show the App menu. Then click “Skills” in the menu.

7. After successful account linking, ask Alexa to discover devices. After a 20-second device discovery. Alexa will show all the discovered devices.

The image shows three screenshots of the Alexa app interface:

- Step 1:** A permissions screen with the Alexa logo at the top. Below it, text reads "Alexa by Amazon will be able to:" followed by "Receive your public profile" and "Control your devices over internet". A large orange "Authorize" button is centered, with a red box highlighting its rectangular shape.
- Step 2:** A "Discover Devices" screen. The title "Discover Devices" is at the top left, and a close button "X" is at the top right. Below the title, a message says "Smart Home devices must be discovered before they can be used with Alexa." Two buttons are at the bottom: "CANCEL" on the left and "DISCOVER DEVICES" on the right, with a red box highlighting the "DISCOVER DEVICES" button.
- Step 3:** A list of discovered devices. The title "Discover Devices" is at the top left, and a "Sort by" dropdown is at the top right. The list shows two items:
 - light
Smart Life smart light(LIGHT) with a "Forget" link to its right. A red box highlights this row.
 - light
Tuya smart light(LIGHT) with a "Forget" link to its right.At the bottom, it says "Showing 2" and has "Discover" and "Forget All" buttons, with a red box highlighting the "Discover" button.

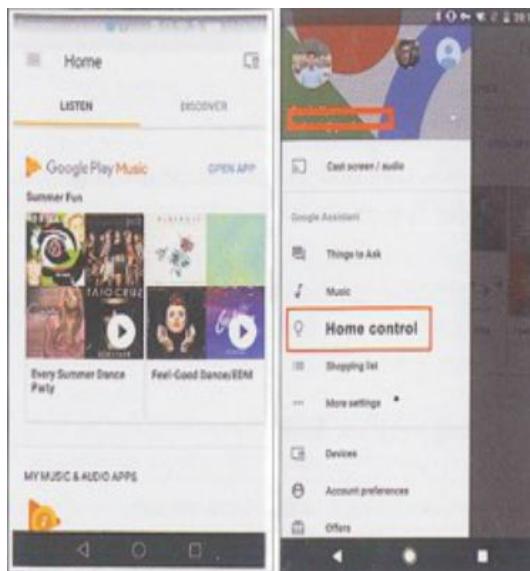

8. Back to Menu by clicking “Home” button, and then click “Smart Home” button.

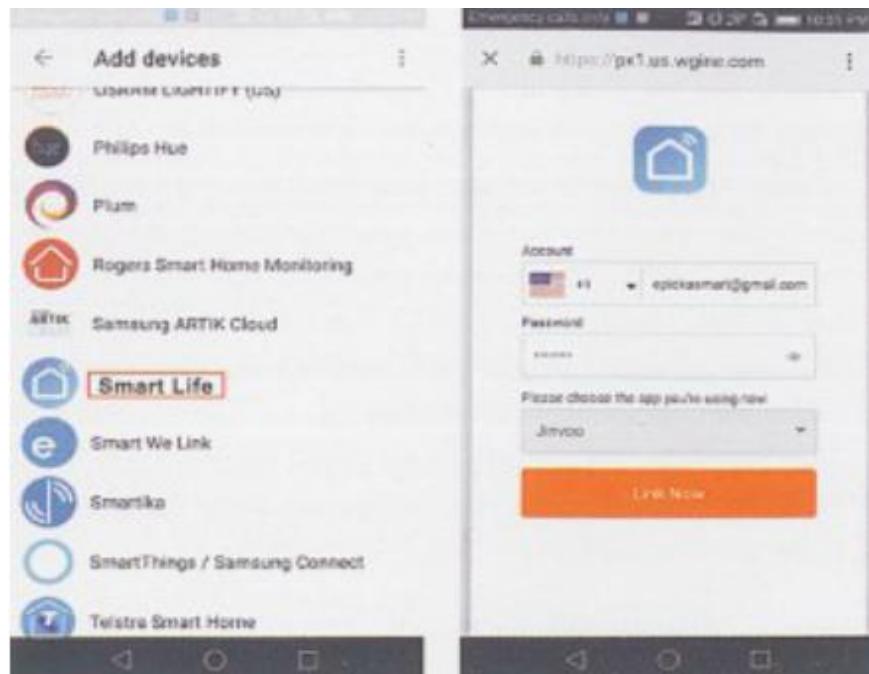

9. In Smart Home page, you can group your devices for different categories. Your **Smart Life APP** has been skilled with Alexa. Now you can control your Smart Light through Alexa.

How to connect Smart Device to Google Home

1. Launch the Google Home App and make sure Google Home speaker is installed. If not, please follow Google Home speaker installation instruction to complete the installation.
2. Once Google Home is installed, in the upper left corner of APP Home page, clicking  button to show APP menu, then clicking “Home Control”

3. On “Add devices” page, scroll down to find “Smart Life” and then click it. Sign in Smart Life App with your Smart Life App account and password choose **Smart Life** App in the drop down menu to complete the account linking.

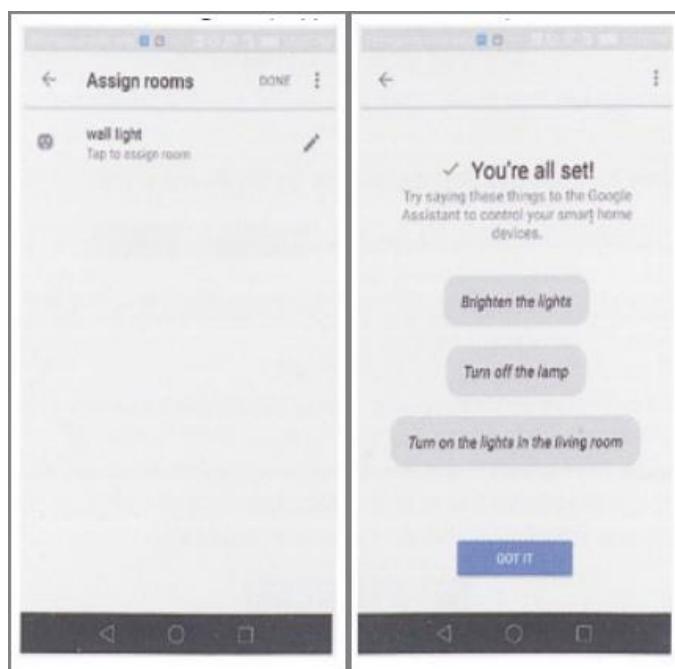

4. After successful account linking, in Google Home App you can see all the smart devices from your Smart Life App account. You can assign rooms for each device.

5. Now you can use Google Home to control your smart device, you can say like:

OK Google, turn on/off wall light

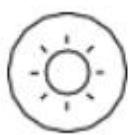

OK Google, set bedroom light to red

changes or modifications not expressly approved by the party responsible for compliance could void the user' s authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC 20cm Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator & your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
