

Test Positions

Front Side (Separation distance of 0mm)	Back Side (Separation distance of 0mm)
 A photograph showing the front side of a black electronic device. The device is positioned horizontally and is partially obscured by a white, rectangular object placed directly above it, resulting in a 0mm separation distance. The device has a textured surface and a small, light-colored rectangular label on its front face.	 A photograph showing the back side of the same black electronic device. It is positioned horizontally and is partially obscured by a white, rectangular object placed directly above it, resulting in a 0mm separation distance. The device has a textured surface and a small, light-colored rectangular label on its back face.
Top Side (Separation distance of 0mm)	Bottom Side (Separation distance of 0mm)
 A photograph showing the top side of the black electronic device. It is positioned vertically and is partially obscured by a white, rectangular object placed directly above it, resulting in a 0mm separation distance. The device has a textured surface and a small, light-colored rectangular label on its top face.	 A photograph showing the bottom side of the black electronic device. It is positioned vertically and is partially obscured by a white, rectangular object placed directly above it, resulting in a 0mm separation distance. The device has a textured surface and a small, light-colored rectangular label on its bottom face.
