cable ?

SKAA Bond Button / SKAA Indicator
Standard Definition
Eleven Engineering Inc.
021418

Essentials

<i>Bond Button</i>	<i>Command</i>	<i>Indicator Meaning</i>
Hold a few seconds	<u>Add / Delete</u> Manually add / delete the current transmitter to / from your Green List	 to  = Added  (flash) = Deleted
-	<u>Auto Add</u> SKAA will automatically add the current Amber transmitter to your Green List if you listen to it for 30 minutes	 to  = Added
1 Click	<u>Green Mode</u> Rotate through your list of <i>favourite</i> transmitters (Green List) — when a favourite transmitter is found, the search stops and audio plays from that transmitter	 (dim) = Hunting  (flash) = Next one  (bright) = Bonded
2 Clicks	<u>Amber Mode</u> <i>Explore</i> for new, unknown transmitters (ones which are not already on your Green List)	 (dim) = Hunting  (bright) = Bonded

Other Commands

<i>Bond Button</i>	<i>Command</i>	<i>Indicator Meaning</i>
3 Clicks	<u>Mute</u> do again to Unmute; any Click command will first Unmute and then do its function	 ,  or  = Muted (slow flash)
4 Clicks	<u>Red Mode</u> If you have 2 or more transmitters on your Green List, power on just the one you want to hear and it plays automatically.	 (dim) = Hunting  (bright) = Bonded
6 Clicks	<u>Factory Reset</u> Clear Green List. Start Over!	 (flash) = Reset Done
Hold during power on	<u>Make a Cluster of Receivers:</u> - Power off all transmitters and receivers - Power on the Master receiver while holding down its Bond Button—hold the button down until the Indicator begins to flash Red - With the remaining receivers within 3 meters of the Master receiver, power on the first one, wait for its Indicator to flash Red and then power on the second one; continue until all of them are powered on - Once all of the Indicators stop flashing (turn solid Red), power off all of the receivers	 (flash) = Receiver has entered 'Cluster Up' mode  (bright) = The Cluster has been successfully made

Notes

- The BATT LED is shown on the power block page
- The POWER BUTTON is shown on the power block page

How SKAA Volume Works

80%
hVOL

X

50%
bVTR

=

40%
nVOL

→

→

I2C volume
command to
DAC

hVOL is "Global" volume which mirrors the host device volume whenever possible. It is maintained and stored in the SKAA transmitter.

bVTR is "Local" volume which is stored in the SKAA Receiver. The +/- volume buttons always affect bVTR.

nVOL is transformed through a volume table (customizable) residing inside the Ginseng and the resulting value is sent out to the DAC via I2C as a hardware volume control command

Wet Sounds A-Link Mk2
Eleven Engineering Inc.
Power States
072519

- Notes**
- “VO” means Virtual Off —this is a power saving state for SKAA transmitters, triggered by lack of audio (silence).
 - In VO state, Ginseng’s RF section is shut off causing all Bonds to drop (all Bonded SKAA receivers are dropped)
 - “Standby” is a power saving state for SKAA receivers.
 - in Standby state, Ginseng shuts off the ADC, DAC and buffers
 - “Sleep” is a power saving state for SKAA receivers. Sleep is triggered by a loss of Bond.
 - In Sleep state, the SKAA receiver improves on the power saving performance of Standby state by also duty cycling the SKAA radio. You can tell the unit has gone to sleep when the SKAA indicator shuts off and the Power LED dims
 - Powering off certain chips will be effected by holding them in RESET
 - ON/OFF is achieved by a press & hold of the Power Button by the user (this transition is not shown in these power state diagrams)

Chip Power					
Chip:	Ginseng	ADC	DAC	SKAA Indicator	Power LED
ON Tx	√	√	-	-	Bright Red
VO	RF off	√	-	-	Dim Red
ON Rx	√	-	√	√	Bright Green
Standby	√	-	-	√	Bright Green
Sleep	RF 33% duty cycle	-	-	-	Dim Green
OFF	-	-	-	-	-

Supply

Li-Po Battery		
Capacity 1 cell (mAh)	600	
Nominal Volts 1 cell	3.7	
Energy 1 cell (mWh)	2220	
Qty Cells in Pack	1	
Energy in Pack (mWh)	2220	
Reg. Efficiency (%)	90%	
Available Energy (mWh)	1998	

Notes

- Dimensions of the LiPo flat pack battery are shown in mech detail slide early in this document

Demand

Operational Mode	Transmit	Receive
Ginseng SiP (mW)	220	150
ADC (mW)	30.5	
DAC Amp (mW)		60
Other (mW)	30	30
Whole Product (mW)	280.5	240
Est. Run Time (hours)	7.1	8.3

Wet Sounds A-Link Mk2

Per Unit Budget
Eleven Engineering Inc.
072519

BOM		Manufacturing / Testing	
Component	Mk2	SKU	Cost
Ginseng	6.50	Mk2 2-pack	40.10
		Packaging & Manual	1.30
ADC	1.05	LOP at 18%	7.45
DAC	0.45	Total (manufactured 2-pack)	48.85
Batt Charge Chip	0.75		
PCB	1.00		
3.3 V Regulator	0.50		
LiPo Battery	2.50		
Buttons and LEDs	0.35		
Pigtail cable, SR, Y & connectors	1.50		
FE Antenna	0.50		
Enclosure	1.50		
Windshield Clip / Mounting Clip	0.70		
Other Electrical	1.75		
Other Mechanical	1.00		
Total	20.05		

Notes

- 1. All figures are USD
- 2. Costs are estimates only
- 3. Charging Adapters and cables are not included (we assume the user has plenty of those already)
- 4. Allocations for master carton are not included

Parameter	Spec Value
Input full scale	1.0 VRMS
Input impedance	10 k ohms
Output full scale	1.0 VRMS
Minimum load required at output	1k ohms
Frequency Range	20 Hz - 20 kHz
THD	< 0.03%
SNR	≥ 88 dB A-weighted
Audio channels	2
Digital Resolution	16 bits x 48 kHz
Max receivers per transmitter	4
Latency	36 ms
SKAA Pro mode (2 receivers, 18 ms)	Yes - Rx mode only
