1 Basic Information

1.1 Instruction

This phone is designed for GSM/GPRS mobile networks. On top of its basic functions, the G1 enables you to use name card style contacts, clock/alarm, calendar, calculator, games, audio player, camera, video player, FM radio as well as other features.
These functions are designed to convenience and enhance the user experience. Our company reserves the rights modifying the content in this Instruction without notice.

1.2 For your safety

In the circumstance of theft or lost property, contact your local service provider or sales outlet immediately.
After contact you must provide them with the IMEI number of your phone which is printed on the back of the device behind the battery. Make sure you make a record of your IMEI number for such an occasion.
Read the guidelines before using your phone. Failure to comply with these guidelines may be dangerous or illegal.

Note: **The quality of your calling and connection depend on your local service provider and signal. We are not responsible for any personal physical damage or damage to property due to inappropriate use.**

14 Battery

Before using the device for the first time, make sure you charge the battery fully. Wrong battery replacements or third party batteries are not recommended as they can damage the phone and possibly explode.

Be sure to follow the instructions to deal with the finished battery.

15 Connect Network

15.1 SIM card

Make sure a SIM card is inserted before you use your phone. The SIM card should be provided to you by your service provider.

All network information is stored in SIM card such as contact information, phonebook, mp4/mp4, etc. For optimal use avoid touching the metal side of the SIM card and keep it away from magnets and electricity. If the SIM card is damaged the phone might not be able to complete all of its functions.

Warning: **Before inserting or removing the SIM card, make sure that the phone is turned OFF and that the Phone is not connected to an external power source, as this could potentially damage the SIM card.**

FCC Warning:

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television

reception, which can be determined by turning the equipment off and on, the user is

encouraged to try to correct the interference by one or more of the following measures:

—Reorient or relocate the receiving antenna.

—Increase the separation between the equipment and receiver.

—Connect the equipment into an outlet on a circuit different from that to which the receiver is

connected.

—Consult the dealer or an experienced radio/TV technician for help.

SAR tests are conducted using standard operating positions accepted by the FCC with the device transmitting at its highest certified power level in all tested frequency bands, although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value, in general, the closer you are to a wireless base station antenna, the lower the power output.

Before a new device is a available for sale to the public, it must be tested and certified to the FCC that it does not exceed the exposure limit established by the FCC, Tests for each device are performed in positions and locations as required by the FCC.

For body worn operation, this device has been tested and meets the FCC RF exposure guidelines when used with an accessory designated for this product or when used with an accessory that contains no metal and that positions the handset a minimum of 5 mm from the body.

Non-compliance with the above restrictions may result in violation of RF exposure guidelines.
