

EXHIBIT B - EUT INTERNAL PHOTOGRAPHS

EUT – Cover off View-1

EUT – Cover off View-2

[illegible]

EUT – PCB Top View

This image shows the top view of the EUT PCB. The board is green and populated with various electronic components. A large black component, likely a microcontroller or processor, is centrally located. To its left is a smaller black component, possibly a memory module. The board is populated with numerous resistors, capacitors, and other passive components. A black connector is visible on the right side. Multiple colored wires (red, green, blue, yellow, white) are connected to the board, likely for power and data. The board is mounted on a black surface.

EUT – Module View

This image shows a close-up view of the EUT PCB, focusing on the microcontroller and other components. The microcontroller is a black chip with the text "ESP8266EX" and "TUBOPH0388" visible. It is surrounded by various passive components, including resistors and capacitors. A black connector is visible on the right side. The board is populated with numerous resistors, capacitors, and other passive components. Multiple colored wires (red, green, blue, yellow, white) are connected to the board, likely for power and data. The board is mounted on a black surface.
